or scan the QR Code under this text.
Dear esteemed Shareholders, Clients and all FPT employees,

In 2019, under the leadership of a young, dynamic and highly tech-savvy Board of Management (BOM) with a globalised mind-set, the Corporation has markedly transformed itself from an IT service enterprise to a provider of end-to-end digital transformation solutions, enhancing its prestige and position in the international market.

Level up in every aspect

In terms of business, revenue and profit have all exceeded the yearly targets, in which the Technology sector witnessed an outstanding profit growth rate of 30% for the second consecutive year. FPT’s global positioning has been significantly strengthened as it became the strategic partner of prestigious global corporations such as Airbus, Toyota, Ford… while providing services to more than 100 clients in Fortune Global 500. With its digital transformation consultancy for two large corporations, FPT has officially become a comprehensive digital transformation solution provider in terms of examining, consulting, technology, infrastructure deployment as well as change management.

Regarding technology, FPT has rapidly developed emerging core technology platforms such as AI, Cloud, IoT, Big Data, Blockchain, etc., from which, it has built an ecosystem of Made-by-FPT solutions to effectively facilitate the digital transformation of businesses and organisations. Many of its products have been highly ranked and internationally recognised. Prominently, akaBot - the robotic automation process (RPA) platform - has been honoured among the Top 30 RPA products worldwide.

Thereupon, these initial achievements have reinforced the confidence that Digital transformation is not only a drive for long-term growth, but also an opportunity for FPT to enhance its position and value within the global supply chain.

A promising new Board of Management

I am deeply hopeful of the new BOM members including CEO Nguyen Van Khoa, two Executive Vice Presidents and 06 chief officers who are youthful at an average age of 40 with good firm, clear understanding of business and technology activities of the Corporation.

For his years of experience leading many key business sectors such as telecommunications (FPT Telecom) and technology (FPT IS), Mr. Khoa has proved his capacity of uniting forces, his instant grasp on up-and-coming technology trends and the Corporation’s core values, hence positioning FPT as a world-class comprehensive digital transformation solution provider.

I would like to express my profound gratitude to FPT’s executives and employees around the world for their tireless efforts, creativity and wholehearted engagement for clients.

By promoting the accomplishments in 2019, as well as the persistence and especially the bravery of the executives, I believe FPT will continue to create innovative values, joining forces for the development of enterprises, organisations and people’s lives, for a prosperous Vietnam as well as a global digital economy.

Assenting unique values offered to clients

For certain, digital transformation will continuously be a global movement irreversibly and a vital issue for many countries, organisations and enterprises over the next decade. The majority of our clients have still been in the early stages of the digital journey. While the pandemic COVID-19 is considered the biggest threat facing every business, it also motivates the industries to accelerate digital transformation to maintain business activities and survive this challenging time. Substantially, this opens up tremendous opportunities for tech companies, with enough strength, resources and sufficient risk management to repel pandemic COVID-19, to readily accompany clients to tackle these obstacles.

Fundamentally, FPT has also gradually been asserting unique values to its customers, which include: sharing successful cases of digital transformation to a large and diverse customer network around the world; consulting, implementing digital and automated solutions, which have been proved effective in dozens of different projects, in order to enhance customer experience; ensuring commitments to customers while improving management capacity, creativity and resilience to overcome all circumstances.

With continuous meticulous preparation of human resources, technology capacity, management capacity and FPT Digital Kaizen methodology, FPT has been dedicated to accompany its clients in improving competence, overcoming current and future hardships, hence conditioning our rise to the position of a world-class comprehensive digital transformation solution provider.

Best regards,
Chairman of FPT

Truong Gia Binh

Chairman of FPT
CEO’S MASSAGE

Living up to the goals that have been set out, the BOM and I commit to devote our heart and soul to steer our business onto the right path under the direction of the Board of Directors; as well as to accomplish the business plan for 2020 towards further breakthrough achievements along with greater value to our shareholders, investors, partners, clients and employees.

Dear esteemed shareholders, investors, partners, clients and all employees,

FPT has witnessed a remarkable year with noteworthy achievements in terms of business, technology while creating new values for its shareholders, investors, clients, the community and the nation.

Revenue and profit before tax have all exceeded the yearly target, at the growth rate of 19.4% and 20.9% respectively. In essence, those are the results of the tech-driven shift in business that has been realized for many years throughout the Corporation.

FPT’s holistic approach has been not only taking control of emerging technologies such as AI, Big data, Cloud, Blockchain but also developing a diverse ecosystem of Made-by-FPT ready-made products and solutions, accelerating the digital transformation process for a prosperous Vietnam. Thousands of enterprises have got noticeable benefits as resource optimisation, cost reduction, productivity improvement and seamless delivery of customer experiences. Many social issues in fields of health care, transportation and education have had more efficient solutions. Millions of people have found it more convenient and easier in public administrative procedures, traffic and medical treatments. Tens of thousands of schools across the country have maintained teaching and learning routines in the pandemic COVID-19 thanks to VioEdu, through which 90 million exercises have been made. Those have been ceaseless efforts of FPT to bring about a better life to every single person with its technology advantages.

FPT has also connected hundreds of business leaders in Vietnam and all over the world to exchange their expertise on digital transformation as well as to share practical experiences for boosting the formation of digital enterprises.

Those notable accomplishments have been achieved on the basis of:

The efforts of the Boards and more than 28,000 employees embarking on a pioneering journey, the best-in-class technology capabilities, the global experience, the thorough implementation of the OKR management principle to guarantee smooth information flow and certain actions: (i) Promoting the OKR method along with the CFR (Conversations - Feedback - Recognition) principle to guarantee smooth information flow and timely solutions, ensuring the effective implementation of strategic tasks; (ii) Synergising power of subsidiaries; (iii) Improving operational capacity via the piece-rate payment system; (iv) Enhancing a culture of compliance and promoting a rotation. We strongly believe that revolutionary changes in management as well as new policies issued over the past year will lead to positive results in 2020.

Living up to the goals that have been set out, the BOM and I commit to devote our heart and soul to steer our business onto the right path under the direction of the Board of Directors; as well as to accomplish the business plan for 2020 towards further breakthrough achievements along with greater value to our shareholders, investors, partners, clients and employees. On behalf of the BOM, I would like to express my gratitude to each of our valuable shareholders, investors, partners, clients and all employees who have always accompanied us on this challenging journey. We look forward to receiving your precious support in the future.

Best regards,
CEO

Nguyen Van Khoa

TOP 50 Most valuable brands in Vietnam 4 consecutive years (Forbes)

TOP 50 Best listed companies in Vietnam 7 consecutive years (Forbes)

TOP 50 Best performing companies in Vietnam 6 consecutive years (Nhip cau dau tu)
Milestones and remarkable activities

Becoming a comprehensive DX service provider

In 2019, FPT signed the first DX strategy consulting contracts with DPDGroup - The second largest international parcel delivery network in Europe and Minh Phu Group – Vietnam’s No. 1 corporation in the processing and export of shrimp products. This is a huge milestone for FPT to become a comprehensive DX service provider, from strategic consulting to providing and deploying services and technology solutions as well as generating the momentum for FPT to gradually realise the goal of making Top 50 Global DX service provider in the next 10 years. As the world-class end-to-end DX service provider, FPT will help global organisations and businesses improve their competitiveness through process optimisation, cost reduction, labour productivity improvement and real-time data operation.

Accompanying Airbus to digitally transform the aviation industry

In June 2019, Airbus recognised FPT as one of the first five global partners in consulting, developing applications related to Skywise platform, paving the way for the acceleration of DX in the global aviation industry. This event has helped FPT to further improve its capacity to provide comprehensive DX services in the aviation industry.

Skywise is the first data platform and application store for the aviation industry, launched by Airbus in mid-2017 for the purpose of supporting DX in airlines companies together with optimising their operations and business activities.

Establishing an ecosystem of Made-by-FPT products which leveraging solutions

On November 21st 2019, at FPT Techday 2019, FPT introduced an ecosystem of more than 60 Made-by-FPT, Make-in-Vietnam platforms and solutions to meet the demands for comprehensive DX of businesses in many areas, thereby enhancing business opportunities for the Corporation.

The ecosystem of DX platforms and solutions of FPT varies in many domains: smart business, smart factory, smart finance, smart health, smart education and smart life. Particularly for smart business sector, FPT-U-services is a unified service portal that helps businesses digitise their entire internal operation processes on a single platform, reducing 90% of the time needed for the traditional method of approving hard copies, cutting internal transaction time by 50%, saving tens of billions of VND.
Rejuvenating the BOM with an average age of 40

At the end of March 2019, FPT appointed Mr. Nguyen Van Khoa as CEO and launched the BOM of 09 members with an average age of 40.

Each of the BOM members has had many years of valuable dedication to the Corporation, having kept significant positions in various business domains at FPT.

For their youthful energy and deep understanding of FPT’s business sectors, Mr. Nguyen Van Khoa and members of the BOM have been expected to implement its strategies quickly and drastically.

Signing the largest software copyright contract of USD 6.5 million

In December 2019, FPT signed a five-year licensing agreement with a Japanese company for up to USD 6.5 million, enabling the use of its RPA platform akaBot to develop an innovative staffing solution for the client.

This contract helped FPT to assert its ability to quickly access new technology trends and expand business opportunities in process automation with RPA technology.

Earlier, in mid-August 2019, FPT reached an agreement with ThinkPower System Integration and Solution Consulting Company to distribute akaBot solution in Taiwan. The product has also been ranked by RPA Hack (a website specialised in evaluating worldwide RPA solutions) as one of the top 30 RPA products in the world.

Connecting society using technology

17,000 people across the country got to further practice their programming skills through mobile apps of FPT to join in campaigns for the environment and children. Thanks to these community activities, FPT employees together have built 63 playgrounds for children in 59 provinces and cities nationwide; raised more than 6,000 new plants in Vietnam and overseas.

More than 1,000 students from many countries around the world have had access to and learned to use digital technologies through the 3rd season of FPT’s Digital Race contest under the theme “Autonomous cars”.

3,000 students across the country got to further practice their programming skills through Codewar 2019, a competition organised by FPT, being based on CodeLearn - an online interactive platform that enables users to learn, practice and evaluate their coding skills.
Financial highlights for the 2015 – 2019 period

The financial figures in this report were provided based on the consolidated financial statements including the financial statements of the Corporation, the financial statements of the companies controlled by the Corporation (subsidiaries) and consolidated business results of its associates under the equity method. Since 2018, FPT’s business results have not unified revenue of FPT Retail and Synnex FPT as these two companies are no longer subsidiaries of the Corporation. Other financial figures of FPT Retail and Synnex FPT were consolidated into FPT’s results under the equity method.

• Head of the Private economic development research board under the Government’s Advisory council on Administrative procedure reform.
• Member of the National Committee on e-Government.
• Member of the National Council for Sustainable development and Competitiveness improvement.

MR. BUI QUANG NGOC
Founding member, Vice Chairman of the BOD

He has more than 30 years’ experience of working in IT and is the first head of the IT division of FPT, which is the precursor of important subsidiaries such as FPT IS, FPT Software, and FPT Telecom. Being prominent in business administration, he has pioneered the modernisation of the Corporation’s administration systems, ensuring that all activities have been carried out efficiently and accurately in accordance with international quality standards.

Nationality: Vietnamese
Qualifications and awards:
• Doctoral Protective Dissertation of database study at University of Grenoble, France in 1986.
• Top 10 IT leaders (CIOs) in Indochina in 2005.

MR. DO CAO BAO
Non-executive member of the BOD

With over 30 years’ experience of working in field, he is one of the leading IT specialists in Vietnam. He participated in creating and managing many of FPT’s national IT projects.

Nationality: Vietnamese
Qualifications:
• Bachelor of Mathematics of Control, Military Technical Academy.

Other positions:
• Vice Chairman of Vietnam Informatics Association.

MR. LE SONG LAI
Non-executive member of the BOD

He has had significant experience in the fields of finance and investment at many state-owned enterprises.

Nationality: Vietnamese
Qualifications:
• Bachelor of Electrical Engineering, Kyoto University (Japan).

Other positions:
• Member of the BOD of Malaysia’s Bao Minh Joint Stock Corporation.
• Member of the BOD of Vietnam National Reinsurance Joint Stock Corporation.
• Member of the Members’ Council of State Capital Investment Corporation.
• Member of the Members’ Council of Trang Tien Plaza Co., Ltd.

MR. JEAN-CHARLES HAMAGUCHI
Independent member of the BOD

He has over 40 years of experience in IT and many years’ in management, and business execution in multinational corporations.

Nationality: Japanese
Qualifications:
• Bachelor of Electrical Engineering, Kyoto University (Japan).

Other positions:
• Member of the BOD of East Japan Railway Company.
• Member of the BOD of Kuraray Company.

MR. DAN E KHOO
Independent member of the BOD

He has nearly 30 years of experience in IT and operations at prestigious technological organisations around the world.

Nationality: Malaysian
Qualifications:
• Doctor of Hull University (United Kingdom).

Other positions:
• Chairman Emeritus of the World Information Technology and Services Alliance (WITSA).
• Chairman of Malaysia Digital Economic Corporation Americas (MDCA, Americas, Inc.), established to develop and promote the globalisation of Malaysia’s digital economy.

MR. TOMOKAZU HAMAGUCHI
Independent member of the BOD

He has nearly 30 years of experience in corporate finance, technical finance and project finance.

Nationality: French
Qualifications:
• Master of Business Administration at Ecole Superieure de Commerce de Reims (France).

Other positions:
• The Commercial counsellor for the French Embassy in Vietnam.

MR. TRUONG GIA BINH

MR. BUI QUANG NGOC

MR. DO CAO BAO

MR. LE SONG LAI

MR. JEAN-CHARLES HAMAGUCHI

MR. DAN E KHOO
The BOM

In March 2019, FPT’s BOD decided to appoint Mr. Nguyen Van khoa as CEO of FPT and dismiss Mr. Do Cao Bao from the position of Executive Vice President of FPT. Thus, as of December 31st 2019, FPT’s BOM consists of 03 members.

3. BUSINESS PERFORMANCE ANALYSIS

WORLD-CLASS SOLUTIONS

LOCAL INSIGHTS
Development strategy for the period of 2020-2022

FPT continues to pursue the long-term vision as becoming the digital corporation and to be listed in the top 50 world-class providers of comprehensive digital services and solutions in 2030.

Technology sector

Market trend

In 2019, the IT market witnessed a sharp jump in DX spending at over USD 1,100 billion, which represented an increase of nearly 18% YoY. Spending on IT services and particularly on DX is forecasted to have good growth in the upcoming years. In particular, worldwide IT Service spending is forecasted to increase from USD 1,029 billion in 2019 to USD 1,268 billion in 2023, with an average growth of 5.4%/year, higher than the growth rate of the current market (3.5%).

Long-term targets

Revenue

1 billion USD in 2021

↑40-50%\(\text{year}^{-1}\) in DX revenue in the period of 2020-2022

Customers

150 customers from Fortune Global 500

10,000 corporate customers in Vietnam

Competitive advantages

DX platforms and solutions

FPT has initially built an ecosystem of diverse DX platforms and solutions to meet customer demands.

The ecosystem of DX platforms and solutions of FPT

Improving operational performance

- Reducing operational costs
- Reducing workforce numbers
- Increasing hospital capacity
- Automating tasks

Optimising employees’ experience

- Reducing human translations
- Reducing human resources with DevOps
- Improving customer experience

Innovating business models

- Enhancing customer experience

- Optimising employees’ experience

The critical partner of large clients

The revenue from the Fortune Global 500 clients has continuously been increased.

>100 Fortune Global 500 clients

↑40% revenue from the Fortune Global 500 clients

Tremendous technology workforce

FPT’s technology personnel have steadily grown both in terms of quantity and quality. Concurrently, FPT is the only enterprise in Vietnam to own science and technology parks – the formation of businesses and knowledge-based institutions – which has created a solid foundation for securing resources for DX and high growth rates in the long run.

According to a New IDC Spending Guide, worldwide spending on DX will reach USD 2.3 trillion in 2023, more than half of all ICT spending, achieving a five-year compound annual growth rate of 17.1% throughout the 2019-2023 forecast period.

DX services

According to a New IDC Spending Guide, worldwide spending on DX will reach USD 2.3 trillion in 2023, more than half of all ICT spending, achieving a five-year compound annual growth rate of 17.1% throughout the 2019-2023 forecast period.
Telecommunications sector

Market trend

The fixed broadband Internet market in Vietnam has grown by 13.8% in 2019, from 13 million subscribers to 14.8 million subscribers.

Long-term targets

Maintaining sustainable growth in subscription, exceeding the general growth of the market, at 15%/year; Striving to provide the best-in-class customer service experience.

Action plans

Focusing on elevating customer experience by:

- Offering satisfaction throughout customer’s entire service usage.
- Applying new technologies to ensure service quality for diverse needs.
- Implementing new services on Internet and FPT Television platforms.
- Expanding international transmission lines and bandwidth.

Education sector

Market trend

The scale of the Education segment at all levels from primary to tertiary and postgraduate reaches about 19 million learners each year.

Long-term targets

Becoming a global education mega-system to meet increasing demands of the society and applying the most advanced educational technologies.

Action plans

Continuing to expand training scale and offering learners access to innovative methods of learning and teaching in order to improve the quality of human resources for society.

Coordinating with Coursera to design and deploy the MOOC (Massive open online course) model for students.

Expanding high quality international affiliate programs.

Action plans

Focusing on building the intensive technology personnel with highly specialised expertise.

Concentrating on 03 directions: (1) To promote the transformation of FPT into a digital enterprise; (2) To implement more thoroughly the OKR management method; (3) To leverage corporate synergies in order to enhance the strengths of subsidiaries as well as to improve corporate competency in human resources, technology, products and solutions.

Increasing revisions and adjustments of FPT Digital Kaizen methodology in order to ensure the digital strategy in parallel with the business orientation and fundamentally to be developed by 03 important components: Digital Transformation (DX) – IT Transformation (ITX) – Personnel Transformation (PX).

Boosting R&D which focuses on: (1) Developing Made-by-FPT low-code platforms and solutions for easy and immediate application; (2) Accelerating services on cloud computing platform; (3) Improving the quality of solutions based on emerging technologies such as Blockchain, AI, Big data analysis and RPA.

Developing high-quality human resources to meet international standards

Focusing on building the intensive technology personnel with highly specialised expertise.

Enhancing management capacity

Concentrating on 03 directions: (1) To promote the transformation of FPT into a digital enterprise; (2) To implement more thoroughly the OKR management method; (3) To leverage corporate synergies in order to enhance the strengths of subsidiaries as well as to improve corporate competency in human resources, technology, products and solutions.

Report and evaluation of the BOM on business performance in 2019

General assessment

The macroeconomic context

2019 has been a year of further bouts of global financial instability with a growth rate of only 2.4%. In aligned with the worldwide circumstance, the IT industry also suffered stagnant growth as IT spending slightly increased by only 0.5%. On the other hand, IT services maintained a higher rate of 3.6% (according to Gartner). In particular, spending for DX exceeded USD 1 trillion for the first time, increasing by nearly 18%.

Regarding its domestic economy, Vietnam has remained one of the fastest growing economies in Asia despite enormous difficulties. According to the General Statistics Office, Vietnam’s GDP grew by 7.02% in 2019, exceeding the Congress’s target of 6.6% - 6.8%. This has also been the second consecutive year that the economy expanded beyond 7%. However, Vietnam’s IT industry saw a slowdown in YoY growth with the rate of 9.8%.

Annual GDP growth

6.78% 6.81% 7.08% 7.02%
5.89% 5.03% 5.42%
5.98% 6.21% 6.81% 7.02%
6.03% 5.22% 5.24%

Business results

• Revenue and profits: In 2019, FPT’s revenue and PBT was VND 27,717 billion and VND 4,665 billion, increasing by 19.4% and 20.9%, respectively; reaching 104% and 105% of the year target severally. Profit after tax (PAT) and PAT attributed to the parent company’s shareholders were VND 3,912 billion and VND 3,135 billion separately, increasing by 21.0% and 19.7% YoY.

• Profit margins and dividend payments: The profit margin continued to improve with an increase of 16.8% (compared to 16.6% of 2018). Basic earnings per share (EPS) reached 4,220 VND, increasing by 19.0%. In 2019, FPT paid VND 1,295 billion for 10% of the remaining dividends in 2018 and 10% of the first advanced dividend of 2019. The dividend payment ratio was over 40%.

• The growth of business sectors: All three business sectors, including Technology, Telecommunications, Education and Investment, witnessed positive development, in which, Technology and Telecommunications together accounted for 94% of FPT’s total revenue and 81% of its PBT. Details of the sectors are as follows:

![chart]

• The Technology sector reached VND 1,973 billion in PBT, increasing by 29.9% and VND 15,783 billion in revenue, equal to 17.8% up. In accordance with the DX-orientation, its revenue reached over USD 100 million, growing by 35.4% YoY.

• The Telecommunications sector’s PBT was at a high rate of 24.1%, reaching VND 1,808 billion; Revenue increased by 17.7%, to VND 10,398 billion.

• The Education and Investment sector saw a slight increase in the PBT growth rate at 0.3%. In elimination of the extraordinary profit from the reversal of the investment provisions in Tien Phong Commercial Bank in December 2018, the sector still gained positive results. Education activities continued to maintain a 2-digit growth rate, which was reflected in the number of 23,822 new enrolments, making the total number of students at the end of 2019 reached 49,570, increasing by 35.3%.

• Market analysis: The foreign market standing of the Corporation has increasingly been affirmed with a high revenue growth of 25.7%, PBT increased by 27.1%, reaching VND 11,452 billion and VND 1,896 billion respectively. The ratio of foreign revenue to total revenue also increased from 38.7% in 2018 to 41.3% in 2019.

In the domestic market, revenue and PBT respectively increased by 15.3% and 17.0% as the domestic telecommunications and IT services were highly profitable.
### Main financial indicators

#### Liquidity ratios

Current ratio and quick ratio in 2019 was respectively at 1.18 and 1.10, which is a slight decrease when compared to that of 2018, for which the increase of short-term debt balance (mainly from short-term loans, unrealised revenues and payables to employees) by VND 1,840 billion is responsible. Current assets increased slightly by VND 573 billion YoY. However, the above ratios were greater than 1.0, indicating high financial safety.

#### Leverage and coverage ratios

As of December 31st 2019, FPT’s total assets were VND 33,394 billion, increasing by VND 3,637 billion, equal to 12.2% compared to that of December 31st 2018. Specifically, cash and cash equivalents balance rose by VND 688 billion, reaching a total of VND 10,155 billion; fixed assets grew by VND 978 billion, reaching VND 7,492 billion due to the continuous investment in expanding business activities. In addition, other long-term prepayment increased by VND 1,260 billion, mainly according to the expansion of telecommunications infrastructure, long-term rental and the cost for television copyrights. Meanwhile, the total of current and long-term liabilities increased by about 12.9%, keeping debt to total assets ratio almost unchanged after two years, at 23.5%.

Besides, the ratio of net debt to equity remained at a safe level as net debt (total interest-bearing debt minus cash and cash equivalents on hand) being negative VND 2,291 billion.

#### Operating efficiency ratios

The operational capability of FPT has improved in 2019 as the cash turnover decreased from 63.4 days (in 2018) to 59.5 days, mainly because of the increasing of the receivable turnover by 0.2 times, equivalent to a 4-day reduction for collection. This indicated that FPT has been improving its capacity of managing credit policy. Besides, the quality of the receivables continued to be guaranteed. Specifically regarding the provision for short-term doubtful debts, the balance as of December 31st 2019 mainly included that of the Telecommunications sector (which was based on the irrevocable telecom charge rate of customers moving out). Due to characteristics of the Telecommunications sector, the annual provisioning was considered a loss in operation. The balance of the provision for short-term doubtful debts of the Corporation as of December 31st 2019 (excluding accumulated provisions for Telecommunications services) was VND 105.4 billion, accounting for 1.8% of short-term trade receivables.

#### Profitability ratios

PBT increasing by 20.9% has helped improve all profitability indicators. In which, the best growth was Return on Capital employed and Return on Equity, which have shown the efficiency use of FPT’s capitals.

**46 - 47 ANNUAL REPORT | BUSINESS PERFORMANCE ANALYSIS**
Business performance by sector

Technology sector

It has been the second consecutive year that the Technology sector achieved an impressive PBT growth of 29.9%, reaching VND 1,973 billion, accounting for 42.3% of the consolidated PBT of the Corporation and exceeding the yearly plan at 102%. Meanwhile, the total revenue of the sector reached VND 15,783 billion, growing by 17.8%, making 56.9% to the Corporation’s revenue, reaching 102% of the yearly plan.

Stark growth at foreign markets

The main growth engines of the Technology sector were the foreign markets, of which revenue accounting for 69% and PBT accounting for nearly 90%; revenue growth and PBT growth were at high rates of over 27%.

Increasing the proportion of software and service revenue

In 2019, FPT continued the shift towards focusing on providing IT software and services. Accordingly, the revenue of these businesses contributed a total of 81% to the revenue of the Technology sector, increasing by 10% compared to that of 2015. On the other hand, the proportion of hardware revenue decreased from 29% in 2015 to only 19% in 2019.
In Japan, FPT proactively restructured towards creating greater on large-scale projects to ensure long-term sustainable growth. Therefore, the 2019 growth rate did decelerate compared to that of 2018 (30%), at 17.9%. The Corporation also sets its development targets of over 25% and ranking among the Top 20 Tech firms in Japan in 2020. Currently, it is at top 37/100 with a revenue of VND 5,534 billion in 2019.

The US market - the second largest market of FPT - lead the revenue increasing for the first time with a stark jump of 47.1%, reaching VND 2,672 billion and exceeding the milestone of USD 100 million. Excluding the consolidation of Intellinet’s business results, the US market would still have achieved a high growth rate of 46.4%. For its M&A deal with Intellinet - the leading American technology consultancy company, the position and value FPT brought to customers in the US market has been significantly enhanced. This has been an important motivation for FPT to achieve breakthrough results in this market.

DX services – the leading force for future growth

The DX segment’s achievements has continued to show the accuracy of the DX strategy in the period of 2019-2021. By the end of 2019, DX Services’ revenue reached over USD 100 million, jumping by 35.4% and accounting for 20% of total IT services revenue. In particular, revenue from providing services in fields of smart cars, mobility, cloud computing and AI accounted for 90% of total DX revenue.

Along with the high growth results, FPT has also claimed its position as an important DX partner of leading corporations in aviation, logistics and retail. In 2019, FPT became an important partner of Airbus to improve the Skywise platform, paving the way for the acceleration of DX for the global aviation industry. In the retail sector, FPT has joined Toshiba in helping Takashimaya Group – owner of the oldest department store system in Japan) to digitally transform and enhance the shopping experience. In logistics, FPT provides DX consultancy for DPDgroup, the second largest parcel delivery network in Europe.

Client base expansion and average revenue per customer increase

In order to achieve the ambitious targets for growth, FPT has implemented a strategy of attracting new customers as well as increasing the average revenue per client. By the end of 2019, FPT has been serving 720 customers in the world, gaining 70 entities compared to that of 2018. Besides, the average revenue/customer increased by 16% compared to 2018.

In the last two years, FPT has focused on getting larger clients (those in Fortune Global 500), its revenue from Fortune Global 500 customers accounted for 44% of total IT services revenue for overseas markets. The average revenue per client of this group also increased by 21% YoY.

The Asia Pacific markets (APAC) witnessed an increase of 43.5% thanks to FPT’s competitiveness enhance by bidding for large-scale technology projects and shifting towards providing comprehensive technology solutions. FPT is now in the top 54 of 700 major IT solution and service providers in this tech world in large technology projects in Malaysia.

European markets has continuously gained good growth momentum in recent years. Revenue in 2019 reached VND 986 billion, which has been the highest increase in the past 4 years at 26.6%. In particular, the German and French remain the two main markets, largely contributing to business results in the European market.

**Domestic IT service segment**

- **Highest growth in productivity within 05 years**

  By the end of 2019, the average number of employees working on IT services for foreign markets reached 15,282 people, an increase of 6.7% YoY; labour productivity increased by 20%, from VND 589 million/person to VND 710 million/person. This has been the highest growth rate within the past 05 years due to the focus on higher value services and the application of automation tools to optimise operational efficiency. In the coming years, FPT will continue to promote operations underpinned by these two directions in order to further encourage productivity along with maintaining high and sustainable growth.

- **710 million VND/year** productivity growth

**Growth in human resources and productivity of foreign IT services**

In order to ensure parallel development in human resources and business, FPT has created an innovative and friendly working environment together with implementing many other welfare policies such as the piecework payment policy in order to “directly associate earnings with results”, helping significantly improve employees’ income; the housing support policy called “Settlement and Occupation - Long-term Cohesion”, helped nearly 500 employees taking out loans for their housing.

**Mr. Nguyen Hoang Minh**

CEO of FPT IS

“Focusing on developing Made-by-FPT applications and solutions along with shifting customer segmentation towards corporate clients, hence creating momentum for future growth.”

The 2019 revenue and PBT of domestic IT services reached VND 4,935 billion and VND 250 billion respectively, increasing by 0% and 57.3%. The pre-tax profit margin reached 5.1%, as an increase of 3.2% YoY. The results mostly may come from the development of project implementation as well as the strategic movement towards reducing hardware sales – a low-margin business segment – to focus on software and services.

In 2019, revenue from Made-by-FPT products for the domestic market grew by 31%. FPT also commercialised many technological products and smart solutions for local organisations and businesses. Those diverse and noticeable products are expected to create motivation for revenue growth of domestic IT services in the near future.
Typical Made-by-FPT products

**FPT.eInvoice**
The electronic invoice solution strictly following tax regulations and safety standards - Offering 24x7x365 support on registration, invoice processing and tax reporting. The Corporation is currently the trustworthy partner of many significant enterprises such as Vincommerce, Hanwha Life, HD Bank, Deloitte, ET; branches of Ford, Toyota, Apple Vietnam... in deploying FPT.eInvoice. More than 80 million e-invoices are expected to be created on this solution in 2020.

*24x7x365 80 million e-invoices*

**FPT.U-services**
The unified service portal for digitalising the entire internal business process of a business on to a single platform, reducing hard copy approval time by 90%, cutting internal transaction time by 50%, saving tens of billions of VND.

*↓90% approval time*

**FPT.eSignCloud**
The solution allowing customers to create digital signatures on e-contracts anywhere, anytime with Internet connection while ensuring legality. The credit approval and signing time will be shortened from at least one day to about 10-15 minutes. This solution helps customers of FE Credit, Home Credit, Easy Credit and OCB replace millions of paper signatures each year, reducing paperwork time and optimising customer experiences.

*10-15 mins approval and signing time*

**FPT.Fortuna**
The integration and data processing platform to provide all necessary data operations. The authority merely needs 01 supervisor and more than 01 hour of exporting reports instead of 02 full-time officers to handle 01 GB of data in 04 days.

*Handling 01GB of data in 01 hour*

**FPT.LGSP**
The integrated data sharing platform for cities/provinces/ministries towards e-Government and/or Smart city models. At present, HCMC has been the pioneer in applying FPT.LGSP on a city-wide scale. After the first phase of implementation, there have been more than 200,000 connected records, 33 database with 6,200 GB of integrated data, 18 shared directories and 11 million people using provided electronic identifiers.

*11 million users*

**FPT.eHospital 2.0**
The overall hospital management system that has currently been applied in 06 health departments, nearly 300 hospitals and clinics nationwide.

*300 hospitals*

**FPT.EMR**
The electronic medical records platform which has been designed for medical staff to collect and synthesise data generated during the examinations and treatments of patients, developing the paperless hospital model.

**FPT.CaresBook**
The electronic medical record book that help patients with paper record replacement, offering them timely and direct connection with hospitals.

*Paperless hospitals*

*Replacing paper medical records*
Telecommunications sector
The Telecommunications sector exceeded its targets, and witnessed impressive growth in both revenue and PBT. Specifically, the revenue reached VND 10,398 billion, gaining 17.7% and PBT reached VND 1,808 billion, increasing by 24.1%. These numbers corresponded to 104% and 109% of the yearly plan, respectively.

Telecommunications service segment

Mr. Hoang Viet Anh
CEO of FPT Telecom

“With the spirit of "Being devoted to miracles", while eagerly implementing digital transformation activities to improve customer experience and boosting operational efficiency as well as productivity, FPT Telecom has sustained stable growth in revenue and profit.”

Telecommunication services continued to maintain a high growth rate with total revenue of VND 9,789 billion, increasing by 18%. In particular, revenue from broadband Internet services for individual customers and households grew by 14.7%; the revenue for corporate customers, including leased line, server, and voice services grew by 17.1%; Pay TV service revenue increased by 40.2%.

PBT of this segment also leaped by 30.2% to VND 1,488 billion thanks to the reduction of the provision rate for public telecommunications services, from 1.5% to 0.7% until July 2018. The pre-tax profit margin reached 15.2% (in comparison to 13.0% in 2018).

In 2019, FPT continued to invest in expanding its coverage for 153 more communes in Hanoi, HCMC and 42 new districts in other provinces across the country in order to meet the target of subscriber growth being higher than the average rate of the current market.

In addition, FPT continues to maintain remarkable service quality and customer experience. It was named the “Fixed Internet service provider with the highest customer satisfaction on service quality and customer care in 2019” by IDG, in collaboration with Vietnam Digital Communications Association (VDCA). It was also awarded the “2019 Vietnam data centre service provider of the Year” title by Frost & Sullivan, based on six criteria: Financial efficiency, Best practice, Availability, Brand transparency, Influence, Price and Performance rating.

Digital content segment

Mr. Thang Duc Thang
Chairman of FPT Online

“FPT Online has made a difference for its services based on researching, meeting the users’ demands and applying technology.”

With the goal of providing various products based on fixed Internet connection, FPT also introduced a series of technology products, including:

- HBO GO: providing 03 live channels - HBO, MAX by HBO, and RED by HBO - with unlimited access to Hollywood movies through a large on-demand video library.
- Foxy: a new mobile application for customers who are using FPT Television service, meeting the demand for service anytime, anywhere as well as for the customer experience personalisation.
- FPT Camera: an IP Camera service product that enables centralised monitoring, storage and management of Camera equipment on Cloud computing platform to offer customers with safety and trust. This will also be a future key product of FPT.

These products have achieved early success right after launching with the subscribers rapidly growing. The Corporation will continue to research and perfect new advanced technology products to create further growth momentum for the segment in a slow-growing market of fixed Internet in Vietnam.

In 2019, the Digital Content segment recorded revenue of VND 609 billion, gaining 13.2% compared to that of 2018, while PBT slightly increased by 1.7%, reaching VND 321 billion. The pre-tax profit margin highly reached 52.6%.

In 2019, FPT has taken advantages of new technologies to improve operational efficiency and enhance the reader experience. Specifically, it digitised the entire sales process on the SaleCloud system, while developing the automatic comment control system and the inventory management system (in advertising) for sales optimisation. As a result, FPT has gained 20 new large corporate clients in Vietnam.

With over 45 million access accounts per year from computers and mobile devices, VnExpress has always remained one of the leading Vietnamese newspaper in terms of readership. In 2019, it organised 18 events with great influence, helping the revenue generated in connection with events increase by double. Some notable events in 2019 included: Vietnam Economic Forum - ViEF; Startup Viet 2019; VnExpress Marathon 2019.
The Education sector witnessed a fruitful year with the enrolment rate increasing by 22.9% YoY, which was equivalent to 23,822 new students enrolled. As a result, FPT Education, including all educational levels, reached the number of 50,000 learners, equal to an increase of 35.3% at the end of 2019. Hence in the period of 2016 - 2019, the compounded annual growth rate of the number of learners was of 36.5% / year, doubling every two years. The reputation of FPT Education has continued to get enhanced as it won the “Brand Influencer in Education and Training” award for the second time in a row.

Besides, the education quality was continually asserted as FPT University became the fifth university to meet the new Licensure and Accreditation Standards issued by the Ministry of Education and Training; the Business Administration program of PCT University was fully accredited by ACBSP (Accreditation Council for Business Schools and Programs) - the leading accreditation organisation of the United States.

FPT Education also became a strategic partner of Coursera, the leading online education platform, concurrently introducing MOOC (Massive Open Online Courses) into the training programs. After nearly half a year of implementation, the program has achieved positive results with 99% of eligible students having attended at least 1 course on Coursera. 4,400 courses taken, over 30,000 hours of study completed and 3,370 certificates granted to learners. These impressive figures have made FPT University become one of the universities with the largest number of learners on the Coursera platform in Asia. This is also an optimistic signal for FPT Education to expand and diversify digital forms of training, contributing to promoting the digital flow in education as well as turn technology into an effective tool to improve education quality.

Together with enhancing the effectiveness of training, FPT also established more high schools in Can Tho and Da Nang as well as acquiring Hanoi Institute of Technology. It also has established official campuses in Can Tho, Da Nang and HCMC, getting one more under construction in Binh Dinh. Also in 2019, FPT Education started to affiliate with Swinburne University of Technology (Australia) to deploy full-time courses in Vietnam.

Mr. Le Truong Tung  
Chairman of FPT University

Through continuous curriculum innovation, teaching and learning adjustments, managing changes in accordance with the digital era, FPT Education has strived to become an organisation providing learners with wider access to digital knowledge, skills and culture, helping them quickly adapt to the 4th Industrial revolution together with enhancing their competitiveness.

Investment and capital expenditure projects

In 2019, FPT proceeded to prioritise investment in 03 main business sectors, meanwhile promoting R&D to generate and maintain a sustainable growth rate. Accordingly, expenditures on the investment in business expansion as well as R&D increased by 32%, reaching VND 3,239 billion. In particular, several major completed projects including:

- In the Technology sector: F-Town 3 - A complex of offices for product R&D and technology solutions, located in the High-Tech Park in District 9, HCMC has been put into use with the area of 69,000m², accommodating 7,500 technology employees.
- In the Telecommunications sector: The coverage of the telecommunications infrastructure has been expanded to nearly 260 communes and districts nationwide. Specifically, FPT has set up new infrastructure to 152 communes in Hanoi and HCMC. Also, projects on renovation of data centres in these two metropolises were expected to be completed and put into operation in 2020.
- In the Education segment: The HCMC campus of FPT University has been officially operationalised, fulfilling the learning needs of about 10,000 students.

Technology activities

With the consistent shifting orientation towards a global leading end-to-end DX service provider, FPT has stepped up the investment in researching and perfecting products as well as developing technology platforms to keep in touch with market demands, meanwhile transforming the Corporation into a digital enterprise.

By the end of 2019, apart from the considerable increase in the DX revenue, the Corporation also managed to create a solid position in its consultancy capacity underpinned by the DX methodology named FPT Digital Kaizen and a massive source of personnel which included Chief Consultant on Digital Transformation, Mr. Phuong Tran, who successfully performed DX for DuPont; 01 Executive Vice President in charge of DX, 01 Chief Digital Transformation Officer and more than 2,500 employees implementing DX projects.

FPT Digital Kaizen methodology has been established upon three basic principles: Think big - Start smart – Scale fast. “Think big” means designing DX with business strategy with the overall approach. “Start smart” is defined as to identify the most critical pain points, to choose the appropriate and feasible solutions for the business, to allocate the right people for the right tasks, and to select easily deployable pilot schemes that can quickly bring about concrete results. “Scale fast” is understood as to get ready to widen the scope of successful pilot projects throughout the organisation.

In order to build world-class technology capacity, FPT continued to boost the investment in R&D to keep up with the global technology trends in 2019, together with developing products and solutions that could help improve operational efficiency, enhance customer experience and create new business opportunities. Concurrently, in order to transform FPT into a digital enterprise, the Corporation has implemented 47 DX projects with 30% of its professional activities being automated to improve productivity and operational efficiency as well as to reduce the burden of administrative errors.
FPT’s technology capacity and remarkable platforms, solutions

The diverse ecosystem of FPT has consisted of 81 Made-by-FPT products and services, including more than 60 DX solutions built on latest technologies of the 4.0 Industrial Revolution such as AI, Cloud, RPA, Blockchain, IoT... for different domains which are divided into 06 categories: Smart Business, Smart Banking, Smart Factory, Smart Health, Smart Education, and Smart Life. Those products’ strategic mission has been to solve pain points of businesses and organisations such as operational optimisation, productivity and creativity improvement, customer experience enhancing as well as to resolve social issues in fields of health care, transportation, public administration...

In addition, FPT has improved its capabilities in the 04 technology trends: AI, Cloud computing, Blockchain and Automation. It was considered as the solutions to meet the needs of comprehensive DX for businesses in various domains, thereby increasing business opportunities and motivating growth for the Corporation.

Artificial intelligence

The comprehensive AI platform - FPT.AI has accompanied 50 domestic and foreign enterprises with 72 million requests/year, more than 1 million end users, digitalising processes/paperwork with 98% accuracy.

Cloud computing

FPT has implemented Cloud services comprehensively from strategic consulting, product transformation, execution and development on most platforms such as AWS, Azure, Office365, Saleforce, CloudStack, OpenStack... as well as in integration with new technologies, namely AI, Big Data, Blockchain. FPT currently has had 1,000 Cloud experts and a set of support tools including Citus™ Cloud Load Test, Citus™ Paas, Citus™ Migration Suite, Citus™ CloudATMS, Citus™ Containerization, all of which can help shorten service time and optimise costs for customers.

Blockchain

The blockchain platform - akaChain supports businesses in quick establishment of network systems and distributive applications based on Blockchain technology, helping operate new business models effectively and promptly, thereby reducing time and initial investment expenses. akaChain is currently being rolled out in different domains such as finance, insurance, retail and supply chain.

Robotics process automation (RPA)

A comprehensive process automation platform for businesses - akaBot helps automate repetitive processes to save time, reduce errors and improve productivity. The solution will cut off task processing time up to 90% and saves manpower by 70%. akaBot is applied in the following tasks: automation of the data download process; automation of the human resource processes...
Personnel alteration

In 2019, FPT’s BOM underwent the alteration due to the dismissing of Mr. Bui Quang Ngoc from the position of CEO and Mr. Do Cao Bao from the position of Executive Vice President. Therefore, as of December 31st 2019, the BOM consisted of 03 members. In addition, the BOM also had the supports from a team of specialised chief officers.

Social responsibility

FPT has developed a sustainable development orientation and strategy to ensure the balance of three factors: Economic development, Community support and Environmental protection. Therefore, along with ensuring a stable economic growth, FPT has paid particular attention to social responsibility activities based on its technological advantages.

In 2019, FPT along with its staff and partners contributed VND 75.8 billion to community activities, in which:

- Contribution from the Corporation’s budget: VND 47.9 billion.
- Contribution from employees: VND 3.7 billion.
- Contributions from other individuals and organisations: VND 24.2 billion.

For many years, FPT has consistently carried out sustainable development activities based on human-centric principles. Therefore, the Corporation has always focused on investing in human resource development as well as support for education and young generations. Besides, FPT consider kindness and compassion among the factors that help to build a stable and developing society. Each year, FPT’s staff and partners all contribute to the society with their practical deeds, from direct accompaniment with the Corporation in volunteer activities to participation in financial donation.

(Please refer to the Sustainable Development Report from page 102 to page 137).
In 2019, the BOM with a young and fierce leadership team has well performed their management activities, as revenue and PBT exceeded the targets by 4% and 5%, increasing by 19.4% and 20.9% respectively. The pre-tax profit margin continued to grow to 16.8%. In addition, all businesses including Technology, Telecommunications and Education have made every effort and achieving positive results.

The Corporation has implemented its strategic directions with success. In particular, the foreign markets continued to be an important growth driver of FPT, earning positive results of VND 11,452 billion in revenue, accounting for 41.3% of the Corporation's total revenue, increasing by 25.7%; and VND 1,894 billion of PBT, accounting for 40.7% of the total PBT of the Corporation, growing by 27.1%. Besides, the DX revenue continued to increase by 35.4%, accounting for 20% of IT service revenue.

- **On technology**: Pioneering in researching and developing the most important core technologies of DX and digital technology services such as AI, Blockchain, Cloud and RPA.
- **On comprehensive DX services and solutions**: Forming an ecosystem of 60 platforms and solutions to help customers improve their operational efficiency, enhancing customer experience and looking for new business opportunities.
- **On human resources**: With the orientation to focus on DX and the development of Made-by-FPT products and solutions, the number of employees in DX projects reached 2,510 people in 2019, leaping by 132% YoY.
- **On transforming FPT into a digital enterprise**: 30% of the Corporation's professional activities have been automated, improving productivity while also reducing management errors.

### Business plans for 2020

With the strategic orientation and achievements in 2019, the BOD has set out the business plan for 2020 as follows:

#### Main targets

</table>

- **The prospective investment plan**

  To meet the high growth targets in 2020, FPT’s investment activities will focus on the following main activities:
  - In the Technology sector: pay particular attention to capital construction investment to meet the needs of leasing long-term offices at reasonable costs; boosting R&D as well as the IT system for business expansion.
  - In the Telecommunications sector: concentrating in telecommunications infrastructure; investing in the North - South backbone, submarine cable network and data centres.
  - In the Education segment: investing in new educational campuses.

### Assessment of the BOD on the BOM's performance

#### Methodology

The BOD deploys the supervision activities through:

- Monitoring the completion of important yearly targets committed by the CEO and the BOM.
- Requesting the CEO and the BOM to report on business results and operational situations in quarterly meetings.
- Coordinating with the Supervisory Board to acquire thorough understandings of the Corporation’s operations, thereby making practical recommendations to help the CEO and the BOM fulfill the tasks assigned by the AGM and the BOD.
- Actively participating in Monday morning briefings and other regular meetings of the BOM to keep abreast of business activities.

#### General evaluation

In 2019, the CEO and the BOM of FPT and its subsidiaries made great efforts in realising the Corporation’s business goals in accordance with the strategic directions approved by the 2019 AGM. Revenue and profits continued to grow positively; Revenue from DX Services, the focus of FPT in the period of 2019 - 2021, has leapt as expected, to a rate of 35.4%.

During its operation, the BOM complied with the applicable laws, the Corporate Charter, Resolutions of the AGM and Resolutions of the BOD, as well as the Chairman Decisions.
Corporate governance in 2019

Application of technology in strategic management and operations of the Corporation

In order to ensure the unified and continuous performance of the Corporation, FPT has developed and utilised various applications and tools to update and monitor information online in all its stages, from strategy development to direction, management and operation, as well as checking and controlling the implementation of its targets.

In 2019, FPT has implemented OKR (Objectives and Key Results) management method within the Corporation. Goals and results of the Corporation, of its subsidiaries, of functional departments and of each employee have been measured, updated and monitored online by the OKR management tool to timely support strategic planning and management.

In addition, the Corporation also implemented applications and tools to support business operations such as human resource management, system operation, and customer management to ensure its unified, effective and transparent operation, heading towards a real-time operating system. In 2019, 30% of the Corporation’s business activities were automated, which improved productivity and reduced management errors.

Ensuring compliance with international standards

In 2019, FPT always strived to abide by the provisions related to corporate governance in general as well as its own administrative regulations for listed public joint stock companies. At the same time, in order to improve compliance with the law on corporate governance, FPT was also striving to improve the quality of management pursuant to international standards through the application and adherence to the criteria within the OECD’s Principles of Corporate Governance and the ASEAN Corporate Governance Scorecard, including the following key issues:

- Ensuring all shareholders’ rights.
- Ensuring the equitable treatment of all shareholders.
- Ensuring the rights and roles of stakeholders.
- Ensuring the disclosure and transparency of information.
- Emphasising the responsibilities of the BOD to shareholders.

Currently, in alignment with the ASEAN Corporate Governance Scorecard, FPT has made many advances in corporate governance over the years and has been working to regional standards, according to best practice. In particular, FPT has responded with excellence to the criteria related to shareholders’ rights, equal treatment for shareholders, stakeholders’ roles, information disclosure and transparency. FPT is developing a plan to best meet all criteria of the ASEAN Corporate Governance Scorecard.

</tr>
</tbody>
</table>

Below are details about FPT’s corporate governance in 2019 regarding the criteria in OECD’s International Governance Principles and the ASEAN Regional Corporate Governance Scorecard.

**Equal treatment of shareholders**

FPT fully and publicly provided information to all shareholders in both Vietnamese and English. All shareholders had the right to attend or authorise to attend the AGM of the Corporation.

**Criteria** | **FPT’s response**
--- | ---
Shares and voting rights | Each shareholder or his/her authorised representative when participating in the AGM was issued with the Corporation’s voting form. The voting form was used in conjunction with each shareholder’s code number so that vote counting could be done accurately and quickly. Shareholders confirmed their opinions on voting contents by marking one of three boxes on the voting form: ‘approvred’, ‘disapprove’ or ‘no opinion’, and provide their signature.

Notices of AGM | All notices, documents of AGM and power of attorney were published simultaneously in Vietnamese and English for shareholders via email or on the Corporation’s website 15 days prior to the time of AGM.

Insider trading and abusive self-dealing should be prohibited | Articles 38 and 39 of the Corporate Charter clearly regulated that the members of the BOD must be responsible for being prudent, honest, avoiding conflicts of interests and devoting for the highest benefits of shareholders so as the Corporation. At the same time, the BOD members must exercise their rights, obligations and responsibilities in accordance with the Enterprise Law, the Corporate Governance Regulations and Charter as well as other internal regulations.

Transactions of related parties of BOD members and key executives | Transactions related to the interests of members of the BOD were detailed in the Corporate Charter and information was periodically published in the Corporate Governance Reports for six months and the whole year.

**Rights of shareholders**

In 2019, FPT ensured the rights of all shareholders and investors, including financial rights, access to information and participation in some important decisions of the Corporation.

Right to participate in decisions concerning fundamental corporate changes | In 2019, FPT implemented the additional business lines registration, amended and supplemented the Corporate Governance Regulations and Charter. The draft proposals were posted on the Corporation’s website 15 days prior to the AGM in both Vietnamese and English. At the AGM, shareholders participated in voting and approving these drafts at a rate of 81.1%. |

Right to participate effectively in, to vote and to be informed about the regulations of the AGM, including voting procedures | On March 29th 2019, FPT held the AGM 2019 in full compliance with applicable laws to ensure the maximum rights and interests of shareholders, particularly as follows: |
| - The invitation to attend the AGM 2019 was sent to all shareholders with full information about the time, place, meeting agenda and basic information about the registration. |
| - All documents of the AGM 2019 were published publicly on the FPT website in both Vietnamese and English 15 days before the date of the AGM. |
| - At the AGM, shareholders directly raised 28 questions to the Monitoring Committee concerning the performance of the Corporation and its subsidiaries. The Chairman, the CEO and other members of the Monitoring Committee of the AGM responded to shareholders’ comments at the meeting in full. |
| - The whole process of shareholder status inspection, voting process and vote counting were all attended by a third party - FPT Securities Joint Stock Company. |
| - In accordance with regulations, The AGM’s resolutions and reports were posted on the Corporation’s website in both Vietnamese and English within 24 hours with all information displayed in chronological order. It accurately and fully recorded the opinions of shareholders, the number of votes and the percentage of voting for shareholders’ opinions, |
Assurance to the rights and roles of stakeholders

The Corporation’s business activities were carried out on the principle of ensuring the highest benefits of stakeholders. At the same time, for stakeholders to speak up and/or lodge a complaint about possible violations of their rights, FPT has publicly disclosed contact information in each field on the Corporation’s website.

Activities of independent members of the BOD

By December 31st 2019, FPT’s BOD have had 03 independent members, namely Mr. Jean-Charles Belliol, Mr. Tomokazu Hamaguchi and Mr. Dan E Khoo. These independent members participated in 100% of the direct meetings of the Board in 2019, during which they contributed important suggestions regarding the Corporation’s development and operation strategy, as well as actively discussed business targets, development orientations, recommendations and appropriate solutions in each business sector. In addition, these independent Board members experienced in being BOD members of many large companies have also played an important role in FPT’s management activities.

Mr. Jean-Charles Belliol
For his extensive practical experience in the finance, at the BOD meetings and the Strategic Conference of the Corporation, Mr. Belliol has given in-depth comments on financial and investing activities, as well as on the business targets for the 2019-2021 period of FPT and its subsidiaries. In 2019, he contributed numerous ideas to senior personnel selection activities of the BOD, concurrently supporting in FPT’s connection with partners and customers in the European market.

Mr. Dan E Khoo
Having been the Chairman Emeritus of the global IT alliance (the World Information Technology and Services Alliance – WITSA), Mr. Khoo has the earliest access to the world’s new technology trends. These are essential practical experiences provoking his strategic advice regarding investments in product development to join the world’s leading technological movements, especially in products, services and solutions related to DX. As a strategic advisor of the Corporation in the market for developing countries, he has always offered positive and practical perspectives to drive its strategic planning and management method towards globalising and pioneering in DX.

Corporate governance training

By December 31st 2019, FPT has had 05 officials who are members of the BOD, the Supervisory Board, the BOM and the corporate secretary owning certificates of corporate governance training. The details are as follows:

- Mr. Le Song Lai – Non-executive member of the BOD
- Mr. Do Cao Bao – Member of the BOD, Executive Vice President
- Mr. Nguyen Viet Thang – Head of the Supervisory Board
- Ms. Nguyen Thi Kim Anh – Member of the Supervisory Board
- Ms. Lai Thi Huong Huyen – Corporate Secretary, Chief of the Chairman’s Office

Members of the BOD, Supervisory Board and the BOM have always actively researched, participated in forums and seminars related to corporate governance to improve the management skills and apply it to the practice of FPT activities.

In 2019, the Board of Directors appointed Ms. Bu Nguyen Phuong Chau to be in charge of corporate governance for the remaining time of the Board (2017 – 2022 period).

Activities of committees under the BOD

The BOD consists of 03 committees, as follows:

<table>
<thead>
<tr>

</tbody>
</table>

The Personnel and Remuneration Committee

In 2019, the Personnel and Remuneration Committee has developed and implemented its personnel strategy, leadership planning program, and remuneration policies which have significantly contributed to the realisation of the Development Strategy of the Corporation and its subsidiaries. Key activities and results in 2019 are as follows:

- Building human resources strategy for FPT based on the OKR management tool with detailed work plans and evaluation results for each period, while promoting digitalisation of human resources activities, improving productivity through People Soft 9.2 system and Self-service system within the Corporation.
- Promoting training activities through training programs and professionals’ management development programs for each group separately or separately in accordance with the Corporation’s orientation. In 2019, there were 313,281 turns of employees trained with an average of 77 hours/person. In addition, the Committee also directed the implementation of the extensive Mentor - Mentee training program throughout the Corporation in order to get all directors/managers involved in training and sharing activities. This program has been going on for 06 consecutive years and has proven to be highly effective, with more than 100 directors becoming Mentors for more than 1,100 Mentees who are managers at all levels each year.
- Implementing the program for planning, developing and rotating leaders to reinforce the Corporation and its subsidiaries’ leadership.
- Developing and issuing salary and bonus policies throughout FPT to encourage employees’ productivity, dynamism and innovation.

The Development Policy Committee

The Development Policy Committee has well performed its leadership role in monitoring issues related to the development strategy of the Corporation and its subsidiaries in 2019 while also supported the BOD and senior officials with their participation in major economic and technological events in Vietnam and overseas to timely update economic information and technology development trends.

In 2019, some of major events attended by FPT’s BOD members and senior officials are: World Economic Forum, Vietnam Private Sector Economic Forum 2019, Vietnam ICT Summit 2019, Industry 4.0 Summit 2019…

The Development Policy Committee has also participated in organising seminars and conferences on DX to update and discuss on FPT’s strategic orientations, activities as well as noteworthy trends and developments of the world and Vietnam.

The Chairman’s Office

In 2019, The Chairman’s Office assisted the Chairman and the BOD in organising meetings and collecting written opinions; drafting and issuing documents of the BOD in compliance with the Corporation’s operating regulations, the Corporate Charter, the Enterprise Law and other legal regulations. The Office coordinated to organise a successful AGM in March 2019.
General assessment of the BOD’s activities

The BOD’s operation in 2019 was effective, complying with the general regulations. The Board managed to timely and directly monitor the activities of the BOM in the implementation of strategic objectives and business plans.

Strategic planning continued to be reinforced. The BOD collaborated with the BOM to ensure the implementation of the new strategy formulation model within the Corporation and its subsidiaries: urgent strategic goals, strategic actions and action plans were clearly defined for each level.

The Chairman of the BOD directly led and supervised the dissemination and implementation of the strategy-building model at all subsidiaries to ensure consistency in directions and actions at all levels.

Administration continued to keep transparent. Independent members of the BOD are all foreigners who have held a long-standing leadership position, highly regarded for their reputation in the regional IT industry with profound experience and extensive networking. In 2019, these members have effectively contributed and assisted in the strategic direction to focus on DX throughout the Corporation, helping FPT to become the leading DX service provider in Vietnam and worldwide.

Evaluation of the BOD’ independent members on FPT’s activities

Mr. Dan E Khoo

The BOD has made important decisions to promote FPT’s development, increase its value and competitive advantage to keep pace with changes in the global business, political and economic environment. The BOD has also worked the courage to innovate the management method to help the Corporation achieve important goals towards globalization, especially in the DX pioneering strategy. It is worth noting that the Corporation also emphasized the importance of investing in talent with proper training programs and facilities that provide an enabling environment to these core personnel a chance to grow and shine.

Mr. Jean-Charles Bellioli

The BOD has implemented all objectives under the 2019 Resolution of the AGM concerning the development of the Corporation and for the benefit of all related parties. The debates in the Board meetings were always very active, transparent and covered a full range of topics from the environment, expert trends, technology to implementation methods, finance and human resources. The BOD was also willing to receive and acknowledge the ideas and suggestions of independent members for financial and investment activities as well as for various business goals for 2019 and the 2019-2021 period of FPT and its subsidiaries.

Mr. Tomakazu Hamauchi

The BOD has been very active in adapting the world’s technology trends, such as DX and AI to provide development directions for FPT, which is clearly shown in the Corporation’s strategy for the 2019 - 2021 period. In 2019, the application of the DQR management method has contributed to improving productivity and helped FPT’s business activities to closely follow its strategic direction.

Orientations for activities of the BOD in 2020

In order to ensure the Corporation’s activities closely following the strategic direction and fulfilling the set-goals, the BOD will focus on implementing these key tasks in 2020:
- Creating strategies: Updating market and technology trends for strategic development and adjustment as well as offering business directions which help FPT quickly seize opportunities and promote strengths to ensure sustainable growth; besides reviewing the methods and processes of developing strategies to ensure consistency and transparency throughout the Corporation.
- Supervising the BOM’s activities: Coordinating closely with the BOM in managing the activities of FPT and its subsidiaries to sharply stick to strategic goals and action plans.
- Developing policies: Directing the issuance and deployment of personnel and investment policies associated with development strategies and action plans to motivate the Corporation’s growth.
- Enhancing governance capacity: Reviewing, adjusting and supplementing relevant regulations on the principle of ensuring compliance with the laws and shareholders’ benefits.
- Allocating human resources: Reviewing, recruiting and reorganizing the personnel structure towards streamlining, effective operation, and simultaneously improving the quality of human resources through training and rotation of personnel throughout the entire Corporation.

Report of the Supervisory Board

The Supervisory Board consists of 03 members, all of whom are auditors in accordance with related laws.

Activities of the Supervisory Board

Number and content of meetings

In the 2019 fiscal year, the Supervisory Board effectively supervised and gave necessary recommendations regarding changes in the Corporation’s management, strengthening the supervision measures, ensuring clear and transparent financial activities of the Corporation. The Supervisory Board has held 04 meetings with the following specific contents:

Monitoring the implementation of the resolutions of the 2019 AGM

In 2019, FPT guaranteed to fully implement the contents approved by the 2019 AGM, and at the same time, ensured exceedingly high growth in both revenue and profit. The Corporation has also applied the OKR strategic management tool which monitors and updates each employee with their goals and results to oversee and implement the yearly plan in a timely, transparent manner.

The cooperation among the Supervisory Board with the BOD, the BOM and management staff

The Supervisory Board was always fully updated with information about FPT’s business plan and situation in 2019. In addition, the Supervisory Board also actively cooperated closely and regularly with the BOD and the BOM to be accurately and fully updated with the Corporation’s activities. Besides, the Supervisory Board has collaborated with the Compliance Monitoring Department to assess the results of internal inspections in 2019.

Supervision activities of the Supervisory Board for the BOD, the BOM and shareholders

The Supervisory Board has had members to attend all 04 direct meetings of the BOD during the year and oversee the implementation of the issuance policy of 3,067,200 preferred stocks for employees with outstanding contributions in 2018, in compliance with the Resolution approved by the 2019 AGM.

Compliance monitoring

In 2019, the Supervisory Board did not identify any abnormal signs affecting or violating the State's and the Corporation's regulations in the activities of the BOD, BOM and other executives.

Other activities of the Supervisory Board

The Supervisory Board oversaw the dividend payment, ensuring compliance with the regulations of the State and the rates approved by the AGM.

The Supervisory Board cooperated with the BOD to evaluate and select the independent auditor from the list approved by the 2019 AGM, and submitted the selection to the BOD for approval of Deloitte Vietnam being the auditor of the annual financial statements of 2019.

Summary of remuneration and operating expenses of the Supervisory Board

During the year, the Supervisory Board did not outsource any consulting services. Total travel expenses, per diem and remuneration of the Supervisory Board was 1,036,800,000 VND, within the total budget approved by the AGM.

Supervisory Board's 2020 action plan

In 2020, the Supervisory Board will focus on implementing the following key tasks:

- Monitoring compliance with the Resolution of the 2020 AGM to ensure the highest interests for shareholders.
- Continuing to closely coordinate in reviewing the auditing reports of the independent financial auditing company and overseeing the implementation of matters raised by the auditors in the auditor's notes as well as in the recommendation letters (if any).
- Reviewing and supervising financial regulations, operational regulations as well as policy regulations issued by the BOD and the BOM during the year to ensure compliance with laws and rights of shareholders.
- Strengthening the coordination between the Supervisory Board and the Compliance Monitoring Department to promptly evaluate, handle arising incidents as well as supervise the handling during and after inspection.

Transactions, remuneration and benefits of the BOD, the Supervisory Board and CEO

Remuneration and benefits

The remuneration of the BOD and the Supervisory Board complied with the provisions of the Resolution of the 2019 AGM and the Resolution No. 01.03-2019/NQ-ĐHQGTPHTT issued on March 8th, 2019 by the BOD. Accordingly, the salary and remuneration for the BOD members was VND 16.33 billion and the bonus rate was not more than 0.49% of the total PBT of the Corporation; remuneration and operating expenses of the Supervisory Board was 1.21 billion.

In 2019, the actual salary and remuneration for the BOD members was VND 16.28 billion, the remuneration and operating expenses of the Supervisory Board was VND 1.04 billion.

Regarding information on the income of the BOM, the Corporation has published in the annual financial statements in accordance with Article 31, Decree 71/2017/ND-CP.

Risk management

General principle

Risk management is an indispensable and inseparable part of each and every process or task in the Corporation. Annually, the CEO leads the reviewing and approving the general risk management framework for the whole organisation. Risk management activities are implemented through close coordination among management lines including the BOM, the Compliance Monitoring Department, the Quality Assurance Department and the Financial Control Department of subsidiaries with heads of divisions in subsidiaries. Issues to control include fields where potential risks may occur, especially compliance risks, standards, procedures and legal regulations. In addition, this activity is also carried out with good coordination between the Corporation and its subsidiaries on the basis of direct and periodic meetings.

Risk management model

The risk management system is decentralised from the Corporation to its subsidiaries. It guarantees that risks are identified and managed by authorised individuals. The risk management system is classified and established as a united system, consistent across the Corporation and its subsidiaries. FPT also builds a mechanism of internal audit, collaborating with the internal audit departments at its subsidiaries to manage compliance risks throughout the whole Corporation. Functional units perform risk management-related activities.

<td>Risk management Department, Constructing, developing a general risk management framework and inspecting the application of the framework.</td>
<td>Providing end-to-end services which meet international quality standards to comprehensively meet consumer needs. This strategy will help FPT continuously improve and enhance its competitiveness. Promote staff training and development, especially for technology staff, in order to improve new technology capabilities and meet the competitive needs. The number of technical personnel of FPT is 17,628, including more than 2,510 DX experts. Continuously improving business models, information systems and internal processes to optimise operations and expenditures by utilising a modern corporate governance system.</td>
</tr>
<tr>
<td>01</td>
<td>All business units and functional departments Taking and managing risks on a daily basis, owning the risk-management procedure,</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The risk management model is aggressively implemented throughout the organisation to minimise adverse effects on business and ensure sustainable development. Risks are handled through a closed process consisting of 05 steps: (1) Risk identification; (2) Risk assessment and analysis; (3) Action plan; (4) Risk handling; (5) Risk measurement, monitoring and report. Risks are identified and divided into different business-related groups to evaluate their impact on core business goals. This allows FPT to determine procedures to identify risks early and quantify risks associated with business plans, enabling the implementation of measures to monitor and eliminate those risks.

FPT also establishes the Strategic Management Office (SMO) in order to monitor and evaluate the key performance indicators (KPIs) system. Those include indicators of risk management throughout the Corporation to ensure prompt identification and monitoring of operation-related risks.

Major risks and risk management measures

Strategic risks

## Operating risks

<table>
<thead>
<tr>
<th>Name of risk</th>
<th>Risk description</th>
<th>Risk management measures</th>
</tr>
</thead>
</table>
| Risks of information disclosure | These risks derive from information not being disclosed in a timely, accurate or sufficient manner. | • Updating legal regulations related to information disclosure for listed companies.  
• Building internal processes on information provision and disclosure in order to ensure that operation and finance information is reported in a timely and accurate manner.  
• Keeping in regular correspondence with those in charge of information disclosure at the State Securities Commission and the HCMC Stock Exchange to check the sufficiency and accuracy of information to be disclosed. |
| Risks of human resources | These risks refer the quantity and quality of personnel failing to keep up with development needs as well as international standards for effective globalisation. | • Building FPT to become a learning organisation, developing highly qualified staff members, organising and arranging staffing based on the Corporation’s long-term goals.  
• Continuing investing in training programs at FPT University through the enhancement of facilities in Da Nang, Quy Nhon, Can Tho, HCMC and Hai Phong.  
• Building competitive compensation policies to ensure following criteria: “Work more – Earn more”, income to be commensurate with work results and contributed values; fairly, transparently and reasonably. Additionally, FPT also implemented other policies such as housing subsidies for employees.  
• Continuing the merger and acquisition (M&A) orientation to enhance the number of national and international consultants and technology experts.  
• Building a good working environment to enhance competitiveness in attracting human resources. |
| Risk for reputation / brand | Bad reputation has a big impact on businesses - from brand image to monetary effects. | • Building a system of collecting and analysing customer comments to promptly adjust and improve customer services. Periodically surveying the satisfaction of stakeholders.  
• Developing a management process to handle communication crisis.  
• Developing regulations on speaking, sharing and providing information on media.  
• Supervising and monitoring information regarding the Corporation on media, social networks daily and hourly to prepare a plan to handle in case of reputation/brand affected by negative press. |
| Information security and cybersecurity risks | Information is one of the most important and valuable assets of an organisation or enterprise. Risk related to information, such as improper disclosure, alteration, loss or rejection of information, seriously affects an organisation’s operations, reputation and strategy. | • Applying thorough measures to prevent data loss and strengthen system safety, thus to ensure information security of the Corporation.  
• Increasing investment in information security systems and solutions, updating the process of applying the latest security standards. Currently, in addition to outsourced systems, FPT has invested in developing a number of cybersecurity products such as CyRadar, FPT TrackEye... |

## Financial risks

<table>
<thead>
<tr>
<th>Name of risk</th>
<th>Risk description</th>
<th>Risk management measures</th>
</tr>
</thead>
</table>
| Risks of exchange rate | Exchange rate fluctuation is a potential risk for FPT's overseas IT services business section. | • Closely monitoring factors that affect exchange rates, diversifying sources of foreign currency earnings.  
• Implementing appropriate exchange rate insurance measures.  
• Implementing flexible sales policies based on exchange rate fluctuations. |
| Risks in ordinary business | Risks in ordinary business activities include uncontrolled bad debts and high inventories. | • Building and complying with procedures for sales, purchasing, contract implementation... in order to reduce risks arising during business operations.  
• Creating policies to control customer liabilities and to manage inventories.  
• Building a software system to automate controlling and approval stages in order to improve management efficiency and minimise risks.  
• Analysing and closely controlling the process, starting with quantifying the demand to purchase. |

## Regulatory risks

<table>
<thead>
<tr>
<th>Name of risk</th>
<th>Risk description</th>
<th>Risk management measures</th>
</tr>
</thead>
</table>
| Regulatory risks | FPT's business activities also take place outside Vietnam. This globalisation requires FPT to comply with foreign laws, especially regulations on migrant employee activities. In addition, cultural differences in a multinational workforce and between the Corporation and its partners present challenges. | • Closely following the policies and major directions of the Government, and actively research and give recommendations to competent authorities to promote the role of IT in boosting economic growth.  
• Researching, updating and complying with provisions, and respect the cultural and business environment of related foreign markets.  
• Training employees in cultural appreciation and sensitivity focusing on countries where FPT conducts business. |
Risk management related to the environment and sustainability

As a green-oriented enterprise, FPT has turned its attention to environmental protection and resource preservation by implementing specific solutions such as: compliance with legal regulations related to the protection of the environment and natural resources; construction of environmentally friendly working office systems; applying technology to reduce energy consumption; and raising staff awareness of environmental protection. FPT organised community events for the environment, encouraging domestic and abroad employees to join in such as “Run for Green” campaign with nearly 7,000 participants.

Over the years, FPT has focused on implementing risk management related to sustainable development from the perspective of reviewing and managing the risks that affect the sustainable development of FPT, risks arising from the social environment that affect FPT, and risks from FPT’s operation and business affecting the social environment. In developing its sustainability strategy, FPT has built and integrated the Corporation’s vision for sustainable development into its business strategy.

Compliance and internal audits

FPT considers compliance and internal audits effective measures to prevent and minimise risks associated with business activities. The assessment made in 2019 included compliance with the laws, regulations and internal procedures of FPT, and provisions ensuring benefits for employees such as compensation and other personnel policies. Along with the internal audit system, the assessment of compliance risk helps FPT ensure that its sustainable development strategy is implemented in all business areas of FPT and throughout its entire system.

Investor relations

Protecting the rights and interests of its shareholders and investors is a top priority in FPT’s investor relations. As one of the 100 largest listed enterprises in Vietnam (according to Forbes Vietnam in 2019), FPT has always oriented activities regarding its relations with the shareholders and investors towards compliance with applicable laws and regulations, protecting and fully exercising shareholder rights, ensuring transparent disclosure of information to all shareholders.

Maintaining yearly regular cash dividends

Through the regular cash dividend policy since its listing, FPT has hoped to ensure periodic dividends and a stable income for its shareholders. In 2019, FPT made the following dividend payments:

- Paying the remaining dividend of 2018 in cash to shareholders at the rate of 10% per share on June 7th 2019. New shares were officially traded on June 28th, 2019.
- Paying the remaining dividend of 2018 by shares to shareholders at the rate of 10%, which are closed on May 20th 2019.
- Advancing the first dividend payment of 2019 in to shareholders at the rate of 10% per share on August 30th, 2019.

Ensuring transparency and diversification of information channels for shareholders and investors

FPT has always strived to diversify and improve the quality of information channels. Shareholders and Investors have access to complete and up-to-date information on strategic directions, business results, corporate governance, through channels such as the Stock Exchange’s page; State Securities Commission; FPT website; periodic investor newsletters via email mass media; digital communication platforms.

In addition, FPT has delivered information to shareholders and investors during events organised by the Corporation. In 2019, in addition to the AGM, FPT organised more than 100 seminars and meetings with domestic and foreign investment funds. In particular, for the first time, FPT held meetings with nearly 300 Vietnamese investors and brokers in HCMC. The event was highly appreciated for high-quality information.

In addition, the Corporation’s leaders actively participated in seminars held by investment funds and large securities companies such as Vietnam Access Day, HSC’s Emerging Vietnam Conference 2019, HOSI-Daswa Vietnam Corporate Day, NTA Asset Symposium 2019.

Return rate of FPT stock in 2019 in comparison with December 28th 2018

Statistics on transactions with foreign investors in 2019

The foreign ownership rate in FPT consistently reached the legal ceiling of 49% in 2019. The number of foreign transactions was 323 sessions, including order and matching transactions, with a total volume of more than 51,8 million shares, amounting VND to 2,805 billion. As the foreign ownership rate reached the maximum percentage permitted, there were no longer stocks available to buy on December 31st 2019.

Transactions of treasury shares

In 2019, the Corporation did not repurchase any of preference shares from staff leaving FPT; Therefore, the treasury shares remained unchanged from the beginning of the year, with 82,376 shares.

Additional share issuance

In 2019, FPT additionally issued 3,067,200 shares to employees with significant contributions in 2018. These shares are locked up three years from the date of issue. The date of transaction is expected to be April 01st 2022.

The Corporation’s charter capital increased in two phases in 2019, risen to 6,167,039,720,000 VND due to the share issuance to employees with significant achievements in 2018 and to 6,783,598,880,000 VND due to 2018 dividend payment by shares to shareholders in accordance with the Resolution of the 2019 AGM.

Investor relations orientation in 2020

In 2020, FPT has developed a plan to further improve efficiency and professionalise investor relations, focusing on these activities:

- Continuing to enhance the information quality, ensuring transparency, completeness and timeliness to shareholders and investors,
- Enhancing meetings to reach the needs of investors in order to improve the quality of investor relations activities,
- Maintaining a reasonable cash dividend policy that maximises value for shareholders,
- Diversifying channels to provide full, timely and regular information to more investors,

5. SUSTAINABLE DEVELOPMENT REPORT
General information

As an important part of the 2019 Annual report, a sustainable development report has been built in order to help investors, shareholders and stakeholders access the information on the development strategy and business operations in terms of sustainable development of FPT.

In this report, significant areas are identified based on a combination of stakeholders’ interests and their impacts on FPT.

This report was developed for the period of January 01st 2019 – December 31st 2019 within the scope of FPT and its subsidiaries’ activities and based on the Global Reporting Initiative (GRI) with three general criteria for all businesses and 33 criteria for specific topics organised by economic, social and environmental fields. It was also informed by the Guide to the Publication of Environmental and Social Information issued by the State Securities Commission (SSC) in cooperation with the International Finance Corporation (IFC).

In addition, on the basis of the Corporation’s strategic objectives and activities, we also referred to the National Action Plan to implement the 2030 Agenda for Sustainable Development and the Document “Our World Transformation: Agenda 2030 for Sustainable Development” which was adopted by the United Nations General Assembly in September 2015 (United Nations’ 17 millennium goals towards sustainable development).

CONTACT: THE REPORT WAS PREPARED BY THE FPT CORPORATE COMMUNICATIONS DEPARTMENT.
If you have any concerns, please contact:
Ms. Bui Nguyen Phuong Chau – Chief Communications Officer
Address: No. 17 Duy Tan street, Dich Vong Hau ward, Cau Giay district, Hanoi

The sustainability orientation and strategy of FPT

Based on business orientation and strategy, FPT has developed a sustainable development orientation and strategy to ensure the balance of three factors: Economic development, Community support and Environmental protection. At the same time, FPT also referred to the UN's sustainable development goals and the GRI Standards when establishing action plans.

Applying international-standard advanced management procedures to FPT’s value chain

Continuously improving the efficiency of corporate governance and production management has been the most effective way to ensure customer satisfaction, enhance competitiveness and bring sustainable benefits to stakeholders. This is also an important tool for ensuring compliance and achieving FPT’s sustainable development goals in line with international standards.

In 2019, FPT has implemented the OKR management method within the Corporation which helped set the goals of each individual in accordance with the targets of the department/subsidiary/Corporation, following the Corporation’s strategies and orientations as well as contributing to improving operational efficiency and labour productivity. Objectives and results of the Corporation, of its subsidiaries, of functional departments and of each employee have been measured, updated and monitored online by the OKR management tool in order to accurately measure goal completion levels whilst sticking to the Corporation’s targets.

In addition, the Corporation and each core business area has also achieved prestigious international standard certifications.

Integrating sustainability in the supply chain and improving service provider selection process.

Integrating sustainable issues in purchasing and service utilisation decisions has helped FPT not only reduce economic, social and environmental risks but also manage the supply chain better. The Corporation’s purchasing and service utilisation activities have been carried out through FPT Purchasing Department. This division is responsible for overseeing the entire Corporation’s procurement activities according to specific procedures and regulations to each group of goods or services.

To ensure sustainability, right from the input stage, FPT has evaluated and selected suppliers in full compliance with legal requirements, sense of responsibility for environmental protection and business ethics. Simultaneously, suppliers are selected based on a set of criteria: price, reputation, quality, delivery readiness, social responsibility and environmental protection. The selection criteria can be flexibly changed depending on each type of goods/services in order to find the most suitable providers to ensure the highest benefits for all parties. Those criteria are calculated on a scale and different weights decided by types of purchasing services.

Stakeholder engagement

Stakeholder approach

FPT defines stakeholders as those who influence or are influenced to some extent by business activities of the Corporation. Its 07 key stakeholders are: customers; shareholders and investors; employees; partners and providers; community; the Government, ministries and government agencies; the press and the media.

Feedback from stakeholders is an important factor affecting FPT’s mind-set and ways of managing and operating business activities.

Establishing transparent information exchange practices between FPT and its partners, coordinating to timely settle arisen problems.

The press and the media
Timely and transparently providing information on FPT’s activities as well as its subsidiaries.

“The two companies have cooperated comprehensively and extensively. Skywise is a global aviation industry project. We are in this together not only for the short term but also for the long future ahead.”

Ms. Nguyen Kim Oanh
Saigon Economic Times reporter
“FPT always provides full, timely and updated information to the press with friendly and sincere attitudes.”

Developing, applying performance and conduct standards with partners.

Being provided prompt and accurate information on FPT’s activities.
Actively providing press with information on FPT’s activities and the ICT industry.

Outstanding results in 2019

Averagely holding 04 monthly events and publishing 07 press releases per month regarding the Corporation’s activities.
Providing valuable and useful information to the community on a variety of topics, from business know-how, new technology trends, to the Corporation’s performance and development orientation.

Outstanding results in 2019

FPT’s solutions

Gold Microsoft Partner. SAP Asia Pacific Japan Award for Partner Excellence. Implementing partner of Skywise - the open data platform developed by Airbus for the aviation industry.

Regularly and promptly supporting and answering questions of the press.
Regularly and actively providing information to the press through FPT newsletters, press releases, press conferences and articles.
Providing analysis and evaluation on the development trends of the domestic ICT industry as well as global trend forecast, giving the press an overview of the industry.
Critical issues in sustainable development

The principle and process of critical issues identification

Based on the context of the domestic and global IT market, stakeholders’ feedbacks and concerns, in reference to the United Nations’ 17 Sustainable Development Goals (SDGs), this report focuses on evaluating and identifying key issues in the relationship between the Corporation’s performance and the economy, society as well as the environment.

The process of critical issues identification:

**Step 01**
Identifying critical issues that have significant impacts on the business operations of the Corporation and the interests of stakeholders, based on analysis of:
- The information on market research and industry reports.
- FPT’s evaluation reports and customer surveys.
- Characteristics of the IT industry and specific business sectors of the Corporation.
- Feedback from shareholders, investors and other stakeholders.
- Guidelines for developing the sustainable development report.

**Step 02**
Key issues identification.
- Selecting key issues that interested stakeholders which are based on 04 criteria including: Corporate governance improvement; Economic growth ensuring; Human resource development; Social and environmental responsibility.

**Step 03**
Key issues analysis in correlation with stakeholders.
- Develop a matrix of key issues.

---

Steady economic growth ensuring

Strategically focusing on DX, in 2019, FPT accomplished its profit target one month in advance and the numbers continued to reach great growth over the same period. FPT’s DX service revenue accounted for 20% of the IT service sector, increasing by 35.4% YoY.

Profit margin continued to rise YoY, reaching 16.8% (16.6% in 2018). Earnings per share (EPS) reached VND 4,220, increasing by 19.0%.

Shareholders’ interests were guaranteed with the cash dividend payment in 2019 of VND 1,295 billion. Dividend pay-out ratio was over 40%.

Employees’ rights were ensured through full payment of salary, 13th month’s salary on the occasion of FPT anniversary and New Year celebration, performance bonuses, health insurance for employees according to FPT Care policy, social insurance, medical insurance...

Besides, FPT has also always been among the brand names that have greatly contributed to the overall development of the economy. In 2019, FPT contributed VND 4,317 billion to the State Budget.

DX enhancing for a prosperous Vietnam

In response to the government’s call of “Towards a mighty Vietnam”, FPT has committed to pioneering in the DX for public services and businesses. To realise this vision, FPT aimed to reduce 30-50% of the time spent on implementing DX projects for organisations/enterprises by its comprehensive digital products and platforms; at the same time training 50,000 high quality technology engineers; and transferring the FPT Digital Kaizen methodology based on its DX experience with international partners.

With the strength of owning an ecosystem of diverse DX solutions and the DX methodology, FPT has provided many organisations and businesses with DX services in 2019, improving their competitiveness, bringing more values and accelerating the formation of a digital economy.

Digitising to improve the capacity of health care services.

More than 300 hospitals and health departments across the country have adopted FPT.eHospital – the comprehensive hospital management system with the capacity to receive an average of about 20 million patients per year, saving 1 million workdays/year for the domestic health care system.

Typically at Bach Mai Hospital, the number of patients received after the implementation of FPT.eHospital increased by 15-20%. At some point the system helped to get up to 9,000 patients/day. On average, the registration procedures for one patient only took 15 seconds to 01 minute; hospitalisation payment procedures or medical insurance procedures also reduced from 30 minutes to only 3-5 minutes per patient.

At the General Hospital of Vinh city, thanks to FPT.eHospital, patients no longer had to wait in long queues for tiring visits. The number of patients who were welcomed daily skyrocketed from 300 to 1,600.

FPT.eHospital is the comprehensive hospital management system, serving from medical examination and treatment, patient management, financial management to managing the hospital’s staff, medical equipment and instruments. FPT.eHospital helps keeping track on patients from the first visit onwards, while properly storing information which can be looked up and reused by medical facilities. At the same time, patients have access to information regarding their health records; they can also make an appointment via mobile devices, as well as through the hospital website.

Bringing new transportation experiences for people by electronic train tickets

Since 2014, in order to reduce the inconvenience and difficulties of buying tickets via stations, agencies or call centres, FPT has proposed that the Vietnam Railway Corporation cooperate in building an electronic ticketing system. After 6 years of implementation, there have been 36 million tickets sold through the electronic train ticket system developed by FPT, 8.2 million of which was only in 2019. Online ticket purchase rate reached 25%.

Buying train tickets has now become a much simpler and convenient experience for people, replacing the frustration of having to hustle and wait, especially on Tet occasions. The system has constantly been upgraded each year to better meet the needs of its passengers. Now train passengers can print their own tickets without having to go to the train station. Tickets can be easily paid for through online payment channels.

Building smart businesses to improve operational efficiency

FPT has built and developed a variety of products and solutions to help businesses get started in their journey to digital enterprises.

All internal business processes of FPT have been digitalised through the unified service portal - FPT.U-services, which reduces 90% of the time needed for traditional hard-copy approval procedures and 50% of internal transactions, saving tens of billions of VND in costs.

High-volume, repetitive tasks in the enterprise’s operations have been automated through a robotic process automation (RPA) platform - akaBot, which saves 90% of the time for processing and up to 70% of manpower.

Real-time authentication, identification and customer care offer customers entirely new experiences. The virtual assistants (Chatbot) are integrated with natural language processing technology, audio aggregation and recognition as well as computer vision from the artificial intelligence platform FPT.AI.
Human resource development

Resource development activities is an important driving force for FPT’s sustainable development, with highlights in 2019 being: Rejuvenating human resources; renovating remuneration policies to attract and retain talents; reinforcing training, especially in technology to enhance internal resources and meet international standards.

Human resource structure

Technology workforce accounted for 61.3% of the Corporation’s total employees, 2,510 of which are involved in DX projects.

In 2019, FPT focused on optimising its operations and increasing productivity. Therefore, while the growth rate of personnel was lower than that YoY, revenue continued to increase at a high rate, productivity of the Corporation increased by 20%.

As of December 31st 2019, FPT’s labour force reached 28,781 people, of which the Technology sector accounted for 61.3%, equivalent to 17,628 people and increasing by 4.6% compared to the same period of 2018. Focusing on DX strategy, the number of technology personnel involved in DX projects reached 2,510 people, an increase of 132% compared to 2018 and accounted for 14.2% of the technology workforce.

Human resource development activities continued with an increase of 2,510 people involved in DX projects, accounting for 14.2% of the Technology workforce.

The quality of human resources continued to be improved upon as 71.7% of employees having acquired university and post-graduate degrees (an 11.9% increase compared to that of 2018).

Human resource continued to be rejuvenated with the proportion of employees under 30 years old accounting for 68.6% of the total workforce of the Corporation, equivalent to 19,731 people. Managers under 40 years old accounted for 81.5% of FPT’s executives, equivalent to 1,526 people. Also in 2019, FPT reorganised the leadership team with the appointment of a new CEO and a team of chief officers with an average age of 40, expecting to carry out its strategies more quickly and drastically.

Although the tech industry is characterised by its high proportion of male employees, FPT has always strived to keep equal and fair opportunities for all employees regardless of gender. In 2019, the number of female employees increased by 5.3%, while male staff increased by 2.3%. In addition, the number of female executives also grew by 15.8% compared to the 14.1% increase of their male counterparts.

Structure of executives by age

The quality of human resources continued to be improved upon as 71.7% of employees having acquired university and post-graduate degrees (an 11.9% increase compared to that of 2018).

Human resource continued to be rejuvenated with the proportion of employees under 30 years old accounting for 68.6% of the total workforce of the Corporation, equivalent to 19,731 people. Managers under 40 years old accounted for 81.5% of FPT’s executives, equivalent to 1,526 people. Also in 2019, FPT reorganised the leadership team with the appointment of a new CEO and a team of chief officers with an average age of 40, expecting to carry out its strategies more quickly and drastically.
Employees’ rights and benefits guarantee
Since FPT’s largest asset is its people, the Corporation has always acknowledged the employees’ contribution to its growth and sustainable development, while complying with the provisions of the Labour Laws and protecting their rightful benefits.

FPT has ensured the workers’ freedom to participate in the activities of the Labour Union while actively facilitated the Labour Union to operate under the Trade Union Law and the Labour Laws. 100% of employees at FPT engaged in Collective Labour Agreements at all levels.

Recruitment policies to attract talents
On recruitment
With the desire to rejuvenate human resources to respond quickly to technology movements, FPT has always been ready to offer high and attractive incentives for talented students. Currently, 68.6% of FPT’s employees are under the age of 30. In 2020, FPT aims to recruit 30% of talented students from the top technology universities nationwide.

On supporting and attracting talents
FPT accepts everyone as they are, for strengths and weaknesses, and at the same time creates the best conditions for its staff to develop themselves, their ambition, and qualities. Therefore, over the years, the Corporation has implemented many key programs such as:

- **Staff planning**
  Creating conditions for young employees to receive trainings and practical experience, to gain in-depth understandings of the business activities and FPT’s core values, hence developing human resources for leadership and senior managing positions of the Corporation and its subsidiaries.

- **Talented intern students**
  Aiming to recruit outstanding Economics and Technology students as candidates for future management positions.

- **Trang Contest**
  Seeking and developing new talents for the Corporation. Many winners (called “Trang Nguyen” – the first doctoral candidates) have been appointed to important positions such as Vice Executive President of FPT, CEO of FPT IS and CEO of FPT Software. In 2019, FPT appointed Trang Nguyen - Chu Quang Huy – who were born in 1990 to the position of CHRO.

The remuneration and welfare policies
FPT has always focused on building a fairly and transparently competitive remuneration policy, ensuring incomes commensurate with working results and the value of contribution to FPT. Employees are evaluated regularly and fairly based on the “Work more – Earn more” criterion.

FPT’s remuneration structure includes:
- **Salary by job titles**: This salary is based on salary surveys of some reputable human resource consulting companies in the world as well as adjusted according to personal job titles and in accordance with FPT’s development, Vietnam’s labour market and the inflation index. Besides, all staff also receive the “13th month” salary paid on FPT’s anniversary and the New Year occasions.
- **Performance bonuses**: Achievements of employees have always been recorded, rewarded promptly, fairly and transparently. Especially in the past year, FPT has started implementing the piece-rate pay system, whereby monthly/quarterly income will change according to actual work results. In addition, the Corporation strongly encouraged start-up activities within the enterprise with a commitment of very attractive bonuses to its employees.
- **Supplementary allowance for employee support**: Travelling, mobile phone top-up, plurality and long-term working abroad allowances have frequently been reviewed and supplemented accordingly.

On welfare policies:
In addition to the common welfare policies for employees as regulated by laws (social/hhealth care/unemployment insurance...), the Corporation has established distinctive welfare policies for comprehensive care for employees and their relatives, as follows:

- Yearly medical check-ups for all employees with official labour contracts at reputable hospitals with expenses paid by FPT.
- In addition to regulated insurance policies, all employees with official labour contracts are protected by health insurance packages at different rates depending on job levels. At the same time, relatives of them are also supported to get health insurance with reasonable fees of charge.
- Employees who have been signed official labour contracts and their relatives are discounted in services of subsidiaries. Preferential treatment is specified for each service.
- Employees who have made great contributions to the success of FPT have been entitled to the housing support policy called “Settlement and Occupation - Long-term Cohesion”. There have been more than 500 employees being granted a home thanks to this policy.

Policies on training and improving human resource quality
Technology requires constant change and creativity. To meet the requirements, FPT has built generations of employees who constantly learn and strive. All employees of level 2.4 and above must attend the annual training programs of the Corporation or complete at least 01 MOOC (Massive Open Online Course).

In 2019, 26,495 employees participated in training programs, accounting for 92.1% of total workforce.

Commitment to human resource utilisation
FPT has been one of the few Vietnamese enterprises to build and maintain its unique corporate cultural values, creating unique advantages for the Corporation in attracting talents as well as employee cohesion. FPT’s culture is understood as a combination of the conduct standards in all production and business activities as well as employees’ mental health care. With the philosophy of giving each member the best conditions for development, FPT has committed to creating a fair, transparent, non-discriminatory working environment, not to use forced labour or child labour in all production and business activities.

In over 30 years, FPT has always strictly complied with the law on labour use, ensuring the rights of employees in accordance with all regulations:

- Signing labour contracts with employees as stipulated by the provisions of the Labour Laws, the guiding documents of the State and in accordance with internal regulations of the Corporation.
- Assigning employees to jobs accordingly to their qualifications, expertise, capabilities, health, job title and gender.
- Strictly complying with the provisions of the Labour Laws and the terms of the Collective Labour Agreement.
- Recruiting in accordance with the procedures posted publicly on the Corporation’s website. Accordingly, candidates do not have to pay any examination fee and the selection is based on personal capabilities and age.
- Focusing on facility development, creating an innovative and eco-friendly working environment. In particular, there are office buildings following the campus model such as F-Ville (Hoa Lac Hi-tech Park, Hanoi), F-Town (the Saigon Hi-Tech Park in District 9, HCMC) and FPT Complex (Danang Hi-tech Park).
Corporate social responsibility

FPT’s sustainable development strategy has been based on the harmony of three elements: Economic growth; Community support and Environmental protection. Therefore, FPT has especially focused on corporate social responsibility activities based on technological strengths and the highest support for the society.

In 2019, FPT, its staff and its partners spent more than VND 75.8 billion on community activities, in which:

- From the Corporation’s budget: VND 47.9 billion
- From the contribution of FPT employees: VND 3.7 billion
- From other individuals and organisations: VND 24.2 billion

For years, FPT has been consistent in implementing sustainable development activities with human orientation as a key factor. Therefore, FPT has always focused on investing in human resource development as well as supporting education and the youth. FPT believes that kindness and the spirit of sharing also help building a stable and developing society. Each year, FPT’s employees and partners all have made contribution to the sustainable development of the Corporation through practical actions, including directly accompanying FPT in volunteer activities as well as financial donation.

Investing in education and the younger generation

Fostering the desire to create opportunities for learning, approaching new technologies and nurturing talents, FPT has always focused on investing in education and young people. In 2019, FPT used up to VND 34.2 billion of its total social spending in this orientation. Some some outstanding activities are:

Scholarship programs for young talents

For its purpose to facilitate comprehensive development of talented young students nationwide, each year, FPT Centre for Young Talents (FYT) grants scholarships for students with high academic achievements, national and international awards. Currently, more than 520 students have participated in FYT, 80% of which have won national prizes in Mathematics, Informatics and Chemistry; 10% have won international prizes in Mathematics and Informatics. Joining FYT, students have been encouraged to pursue their aspirations, to network, to inspire and be inspired, and to improve crucial soft skills for their future.

Nguyen Van Dao Scholarships

In order to seek, attract and foster talents, in 2019, FPT spent VND 33.4 billion to award Nguyen Van Dao scholarships to 1,644 students belonging to the following one of three criteria:

- The studious scholarships for disadvantaged students with good academic performance.
- Academic excellence scholarships for those with great educational achievements.
- Literature - Sports - Art scholarships for those with special achievements in corresponding fields.

Scholarships in 10 years

4,911 scholarships

184.4 billion VND

2019 Codewar programming contest

Based on CodeLearn - the online programming, training and exam platform, FPT organised the 2019 Codewar programming contest with participation from more than 3,000 students nationwide. The competition created opportunities for students to practice, improve their knowledge and develop their skills. Codewar 2019 was considered one of the largest professional programming playgrounds for students in the country.

CodeLearn platform developed by FPT is now a self-learning programming platform with more than 30,000 members, 120 collaborators in Vietnam and Japan, 12 courses and 1,000 practice exercises.

The Digital Race – in theme of Autonomous cars - for students

In 2019, the competition welcomed more than 1,000 students from 36 universities across the country and two international teams from Russia and the UK. The contestants got to experience and were given access to various technologies for image processing, embedded programming, AI… while practising soft skills such as team building, project management and team work. After the competition, all student creations were packaged and publicised to further cultivate the technology community.

This was the third year that FPT organised the Digital Race with the desire to build a new technology playground for students in Vietnam and around the world.
Building playgrounds for children in 59/63 provinces and cities

From August 5th to 28th 2019, FPT Telecom (one of FPT’s subsidiaries) launched the FoxSteps campaign to spread positive inspirations to each employee and to accompany the community’s effort for a fuller childhood of all Vietnamese children. Accordingly, 10,000 FPT Telecom’s employees set a record of running 520,975 kilometres - equivalent to 13 times around the Earth. Each kilometre represented VND 10,000 in contribution to building playgrounds with full equipment and facilities for children nationwide. By the end of the campaign, 63 children’s playgrounds were completed in Vietnam’s 59 provinces and cities.

Planting 6,000 trees globally

Since August 2019, FPT Software (one of FPT’s subsidiaries) has launched the Run for Green campaign on a global scale to promote healthier and greener lifestyle. After more than 2 months of launching the campaign, nearly 7,000 FPT Software employees participated in the run with a total distance of nearly 1 million km, equivalent to more than 20 circles around the Earth, hence 20,000 new trees being planted globally. In 2019, 6,000 trees out of the 20,000 committed, were newly planted in Vietnam, Japan and Slovakia. The remaining will be finished in 2020.

Holding FPT for Community Day

On the occasion of the 2019 Youth Month and FPT for community Day in March 13th, FPT collaborated with the Central Committee of the HCM Communist Youth Union to organise the 2019 “March in border areas” Day with the theme being “Towards the border”. The practical deeds of the youth and FPT employees in the series of events have shown their gratitude to the heroic martyrs who fought for the Northern border 40 years ago, whilst promoting the patriotism and the responsibility of Youth Union members in building and protecting the country. More than 6,000 national flags and 1,000 stationery sets with a total value of VND 1.2 billion were presented to families under preferential treatment policy and pupils in border provinces.

Also in 2019, FPT promoted the humanitarian movement with dozens of blood donating events. Thousands of FPT employees were willing to participate in the meaningful activities at times the community urgently needed blood mobilisation. In the past 10 years, FPT employees have donated 20,584 blood units.

Since 2010, FPT has chosen March 13th as “FPT for community Day” as each staff member made a small contribution to society by specific actions. Over 10 years, the day has adopted humanistic topics such as: “Sharing pain, bringing smiles”, “Giving smiles - Giving joy”, “Contributing books, making wings of dreams”, “I am kind” ... FPT’s philanthropy has come to thousands of schools across the country, thousands of households affected by natural disasters and millions disadvantaged students ...

Green construction

With offices all across the country, FPT has always been conscious that a green office model not only helped the Corporation achieve energy efficiency and reduce operating costs, but also enhanced the awareness of environmental protection among its employees. In 2019, FPT fully complied with the regulations on waste and emissions management in buildings without any related violations.

In addition, when investing in building office areas, FPT has always prepared for environmental impact assessment reports and complied with environmental protection regulations. At the same time, during the construction of its facilities, FPT has always prioritised the application of new technologies, eco-friendly materials and made the most of the natural energy sources to minimise environmental impact and energy consumption.

FPT has also regularly implemented propaganda activities and programs to raise awareness of environmental protection among its employees:

• Collaborating with international and domestic organisations to increase awareness of environmental protection and energy saving.
• Propagating and encouraging employees to take the stairs instead of elevators.
• Establishing a bicycle club and encouraging staff members to cycle to work.
• Responding to the Earth Hour campaign.

The Board of Management of FPT Corporation and its subsidiaries (herein collectively called the “Corporation”) presents this report together with the Corporation’s consolidated financial statements for the year ended 31 December 2019.

THE BOARDS OF DIRECTORS AND MANAGEMENT

The members of the Boards of Directors and Management of the Corporation who held office during the year and to the date of this report are as follows:

Board of Directors
- Mr. Truong Gio Binh: Chairman
- Mr. Bui Quang Ngoc: Vice Chairman
- Mr. Do Cao Bao: Member
- Mr. Jean Charles Bellal: Member
- Mr. Le Song Lai: Member
- Mr. Tomakazu Hornaguchi: Member
- Mr. Do E Khoo: Member

Board of Management
- Mr. Nguyen Van Khoa: Executive President (appointed on 29 March 2019); Executive Vice President (resigned on 29 March 2019)
- Mr. Bui Quang Ngoc: Executive President (resigned on 29 March 2019)
- Mr. Nguyen The Phuong: Executive Vice President
- Mr. Hoang Viet Anh: Executive Vice President
- Mr. Do Cao Bao: Executive Vice President (resigned on 15 March 2019)

Board Of Management’ Statement Of Responsibility

The Board of Management of the Corporation is responsible for preparing the consolidated financial statements, which give a true and fair view of the financial position of the Corporation as at 31 December 2019, and its financial performance and its cash flows for the year then ended in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to consolidated financial reporting. In preparing these consolidated financial statements, the Board of Management is required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting principles have been followed, subject to any material departures disclosed and explained in the consolidated financial statements;
- Prepare the consolidated financial statements on the going concern basis unless it is inappropriate to presume that the Corporation will continue in business; and
- Design and implement an effective internal control system for the purpose of properly preparing and presenting the consolidated financial statements so as to minimize errors and frauds.
INDEPENDENT AUDITORS’ REPORT

To: The Shareholders
The Boards of Directors and Management
FPT Corporation

We have audited the accompanying consolidated financial statements of FPT Corporation and its subsidiaries (the “Corporation”), prepared on 03 March 2020 as set out from page 04 to page 47, which comprise the consolidated balance sheet as at 31 December 2019, the consolidated income statement and consolidated cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Consolidated Financial Statements
Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to consolidated financial reporting, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility
Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Corporation’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Corporation as at 31 December 2019, and its financial performance and its cash flows for the year then ended in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to consolidated financial reporting.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. GENERAL INFORMATION

Structure of ownership

FPT Corporation (the “Company”) was incorporated as a State-owned company in Vietnam and subsequently equalised in accordance with Decision No. 178/QD-TTg, following which the Company officially operated as a joint stock company. FPT Corporation was established under Business Registration Certificate No. 0103010141, issued for the first time by Hanh Authority for Planning and Investment dated 13 May 2002 and its amendments.

According to the amended Business Registration Certificate dated 19 December 2008, the Company changed its name from the Corporation for Financing and Promoting Technology to FPT Corporation.

According to the amended Business Registration Certificate dated 11 June 2019, the Company’s charter capital is VND 6,796,586,800,000.

Since December 2006, the Corporation’s shares have been listed on Ho Chi Minh City Stock Exchange.

The total number of the Corporation’s employees as at 31 December 2019 was 28,781 (31 December 2018: 27,843).

Operating industry and principal activities

The principal activities of the Corporation are to provide IT and telecommunication products and services. The main products and services provided are: (i) software development, including software outsourcing, software solutions, software services and ERP services; (ii) system integration; (iii) informatics services including system management, BPO service, Data Center service etc.; (iv) telecommunication services including Internet services and value added services; (v) digital contact services including online advertising etc.; (vi) general education, college, university and postgraduate training services.

Normal production and business cycle

The Company’s normal production and business cycle is carried out for a time period of 12 months or less except some systems integration projects which are carried out for a time period of more than 12 months.

The Corporation’s structure

As at 31 December 2019, FPT Corporation had 6 subsidiaries including:

- FPT Information System Corporation;
- FPT Software Company Limited;
- FPT Telecom Joint Stock Company;
- FPT Education Company Limited;
- FPT Online Service Joint Stock Company; and
- FPT Investment Company Limited.

And 4 associates as follows:

- FPT Digital Retail Joint Stock Company;
- Synnex FPT Joint Stock Company;
- FPT Fund Management Joint Stock Company; and
- FPT Securities Joint Stock Company.

Disclosure of information comparability in the consolidated financial statements

Comparative figures are the figures of the audited consolidated financial statements for the year ended 31 December 2018.

2. ACCOUNTING CONVENTION AND FINANCIAL YEAR

Accounting convention

The accompanying consolidated financial statements, expressed in Vietnamese Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to consolidated financial reporting.

The accompanied consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

Financial year

The Corporation’s financial year begins on 01 January and ends on 31 December.
3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Corporation in the preparation of these consolidated financial statements, are as follows:

Estimates

The preparation of the consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the financial year. Although these accounting estimates are based on the management’s best knowledge, actual results may differ from these estimates.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) for the period from 01 January 2019 to 31 December 2019. Control is achieved where the Company has the power to govern the financial and operating policies of an investee enterprise so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

Intergroup transactions and balances are eliminated in full on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business combination and the non-controlling interests’ share of changes in equity since the date of the combination. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Business combinations

On acquisition, the assets and liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognized as goodwill.

Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired is credited to the consolidated profit and loss in the year of acquisition.

The non-controlling interests are initially measured at the non-controlling shareholders’ proportion of the net fair value of the assets, liabilities, and contingent liabilities recognized.

Investments in associates

An associate is an entity over which the Corporation has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. Interests in associates are carried in the consolidated balance sheet at cost as adjusted by post-acquisition changes in the Corporation’s share of the net assets of the associate. Losses of an associate in excess of the Corporation’s interest in that associate (which includes any long-term interests that, in substance, form part of the Corporation’s net investment in the associate) are not recognized.

Where a group entity transacts with an associate of the Corporation, unrealised profits and losses are eliminated to the extent of the Corporation’s interest in the relevant associate.

Goodwill

Goodwill represents the excess of the cost of acquisition over the Corporation’s interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary at the date of acquisition. After acquisition date, if the Parent continues making investment in the subsidiary, it should determine the cost of additional investment and corresponding increase in ownership of the carrying value of the acquired net asset of the subsidiary (not applying fair value as an acquisition date). The difference between the cost of additional investment and the carrying value of the acquired net asset should be recorded directly into retained earnings (similar to transactions among internal shareholders).

Goodwill arising on the acquisition date is presented separately as an intangible asset in the consolidated balance sheet and is amortised on the straight-line basis in the consolidated income statement according to current regulations. In case the amount of goodwill impairment loss in the period is more than the annual amortised amount on the straight-line basis, the loss amount shall be recognised.

On disposal of a subsidiary, the attributable amount of unrealised goodwill is reduced corresponding to the disposed share proportion and included in retained earnings in case the Parent retains its control over the subsidiary, or reduced in full and included in the determination of the profit or loss in case the Parent loses the control.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial investments

Held-to-maturity investments

Held-to-maturity investments comprise investments that the Corporation has the positive intent or ability to hold to maturity, including term deposits (commercial bills), bonds, preference shares which the issuer shall redeem at a certain date in the future, loans held to maturity to earn periodic interest and other held-to-maturity investments.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price plus directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the consolidated income statement on accrual basis. Pre-acquisition interest is deducted from the cost of such investments at the acquisition date.

Held-to-maturity investments are measured at cost less provision for doubtful debts.

Provision for doubtful debts relating to held-to-maturity investments is made in accordance with prevailing accounting regulations.

Equity investments in other entities

Equity investments in other entities represent the Corporation’s investments in ordinary shares of the entities over which the Corporation has no control, joint control or significant influence.

Equity investments in other entities are carried at cost less provision for impairment.

Provisions for impairment of long-term investments are made when there is reliable evidence for declining in value of these investments at the balance sheet date.

Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

Inventories

Inventories are stated at the lower of cost and net realizable value. Cost comprises direct materials and where applicable, direct labor costs, and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost of inventories within the Corporation is calculated using the first in first out (FIFO) method and inventory recording method is the perpetual method. Net realizable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realizable values as at the balance sheet date.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

The costs of self-constructed or manufactured assets are the actual construction or manufacturing cost plus installation and test running costs.

Tangible fixed assets are depreciated using the straight-line method over their following estimated useful lives:

<table>
<thead>
<tr>
<th>Useful Life (Years)</th>
<th>Buildings and structures</th>
<th>Machinery and equipment</th>
<th>Motor vehicles</th>
<th>Office equipment</th>
<th>Other assets</th>
</tr>

<td>3 - 25</td>
<td>4 - 6</td>
<td>3 - 10</td>
<td>3 - 6</td>
<td>3 - 5</td>
</tr>
</tbody>
</table>
Finance lease assets and depreciation
Finance lease assets are acquired from finance lease transactions whenever the terms of the lease transfer substantially all the rights and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are recognised as assets of the Corporation at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged to profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Corporation’s general policy on borrowing costs.

Intangible assets and amortisation
(i) Land use rights
Land use rights are stated at cost less accumulated amortisation. Definite land use rights are amortised using the straight-line method over the duration of the rights to use the land. Indefinite land use rights are not amortised.

(ii) License, copyright and patent
Purchase price of license is accounted for as intangible asset. License is amortised to the consolidated income statement on straight-line method over a period of 3 to 5 years. The right to operate the high-speed internet lines is amortised over 15 years.

Purchase prices of copyright and patent are capitalized and accounted for as intangible asset. Copyright and patent are amortised to the consolidated income statement on straight-line basis over a period of 3 to 5 years.

(iii) Brand name, trademark and list of customers.
Purchase prices of trademark and brand name are recorded as intangible asset. Trademark, brand name and list of customers are amortised to the consolidated income statement on straight-line basis over their estimated useful lives.

(iv) Computer software
Purchase price of new computer software, which is not an integral part of related hardware is capitalised and accounted for as intangible asset. Computer software is amortised to the consolidated income statement on straight-line basis over a period of 3 to 5 years.

Construction in progress
Properties in the course of construction for production, rental, or administrative purposes, or for other purposes, are carried at cost. Costs include costs that are necessary to form the assets in accordance with the Corporation’s accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Prepayments
Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods, including land rentals and other types of prepayments. Prepaid land rental includes land rental and its attributable cost and office rental. Prepaid land rentals are charged to the consolidated income statement using the straight-line method over the lease term.

Other types of prepayments comprise costs of small tools, supplies and spare parts issued for consumption; expenses for implementing contracts with internet subscribers; expenses for transforming to optical fiber system; PayTV installation cost; and other types of prepayments which are expected to provide future economic benefits to the Corporation. These expenditures have been capitalised as prepayments, and are allocated to the consolidated income statement using the straight-line method in accordance with the current prevailing accounting regulations.

Payable provisions
Payable provisions are recognised when the Corporation has a present obligation as a result of a past event, and it is probable that the Corporation will be required to settle that obligation. Provisions are measured at the management’s best estimate of the expenditure required to settle the obligation as at the balance sheet date.

Provision for warranties
The provision for warranties relates mainly to goods sold and services rendered. The provision is based on estimates derived from historical warranty data associated with similar products and services.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Bonus and welfare funds
The Corporation distributes up to 10% of net profit after tax of subsidiaries to bonus and welfare funds.

Revenue recognition
Revenue is recognised when the outcome of such transactions can be measured reliably and it is probable that the economic benefits associated with the transactions will flow to the Corporation.

Revenue from the sale of goods
Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

a. The Corporation has transferred to the buyer significant risks and rewards of ownership of the goods;

b. The Corporation retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;

c. The amount of revenue can be measured reliably;

d. It is probable that the economic benefits associated with the transaction will flow to the Corporation; and

e. The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from rendering of services
Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction on the consolidated balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

a. The amount of revenue can be measured reliably;

b. It is probable that the economic benefits associated with the transaction will flow to the Corporation;

c. The percentage of completion of the transaction at the consolidated balance sheet date can be measured reliably; and

d. The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from software development, system integration and informatics services
Revenue is recognised in the consolidated income statement by reference to the percentage of completion of transaction at the year end. The percentage of completion is assessed by performance or the percentage of the incurred expense of the completed work over the total contract cost estimate. Revenue is not recognised if there is significant uncertainties related to recovery of receivables.

Revenue from processing services
Revenue from processing services is recognised in the consolidated income statement when the goods have been processed and accepted by the buyer. No revenue is recognised there are significant uncertainties regarding recovery of the receivables due.

Revenue from telecommunication services
Revenue from telecommunication services is recognised on pro-rata basis over the period during which the services are actually provided to customers.

Revenue from online advertising services
Revenue from online advertising services is recognised on the basis of work performed.

Revenue from tuition and fees
Revenue is recognised in the year when services are rendered. Tuition and fees collected in advance from the students are recorded as unearned revenue on the consolidated balance sheet and released to the consolidated income statement in the year in which the semester falls.

Tuition and fee payment
Tuition and fees are paid in advance prior to the beginning of each semester.

Enrolment fee or application fee
A one-time fixed application fee is charged per student and collected with applications for enrolment. Proceeds from the application fees are used to defray the costs associated with all procedures relating to processing each student’s enrolment, including the administration of applicable assessment evaluations or school records and appropriate placement for the student. The application fee is not refundable.

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Dividend income from investments is recognised when the Corporation’s right to receive payment has been established.

Foreign currencies
Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction date. The balances of monetary items denominated in foreign currencies as at the balance sheet date are translated at the exchange rates on the same date. Exchange differences arising from the translation of these accounts are recognised in the consolidated income statement.

Goodwill and fair value adjustments arising on the acquisition over a period of 3 to 5 years of foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Financial statements of foreign operations

For the purpose of presenting consolidated financial statements, the assets and liabilities of the foreign operations (including comparative figures) are expressed in reporting currency using exchange rates prevailing on the balance sheet date. Income and expense items (including comparative figures) are translated at the average exchange rates for the year, unless exchange rates fluctuated significantly during that year, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are classified as equity and transferred to the Corporation's foreign exchange reserve. Such translation differences are recognised in profit or loss in the year in which the foreign operation is disposed of.

Borrowing costs

Borrowing costs are recognised in the consolidated income statement in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for the intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for the purpose of construction of fixed assets and investment properties, borrowing costs are capitalised even when the construction period is under 12 months.

Earnings per share

The Corporation presents basic earnings per share (EPS) and diluted earnings per share (Diluted EPS) for its ordinary shares. Basic EPS is calculated by having the profit or loss attributable to the ordinary shareholders of the Corporation divided by the weighted average number of outstanding ordinary shares during the year. Diluted EPS is determined by adjusting the profit or loss attributable to the ordinary shareholders and the weighted average number of ordinary shares outstanding taking into consideration the effect of all dilutive potential ordinary shares, which comprise convertible bonds and share options.

Related parties

Related parties include associates and key management personnel of the Corporation.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Corporation intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities’ examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. SEGMENT REPORTING

A business segment is a distinguishable component of an enterprise that is engaged in providing an individual product or service or a group of related products or services and that is subject to risks and returns that are different from those of other business segments.

The Corporation has two major segments under the management of FPT Corporation (the "Corporation") as follows:

- **Information Technology and Telecommunication**
  - Telecommunication: providing internet services to individuals and households, internet services to enterprises such as providing internet based line service, domestic and international telecommunication, domain, hosting, Web Portal services, IPTV etc.
  - Digital content: providing online services for enterprises and individual customers, including online newspapers (such as VnExpress.net, NgoiLoi.net, Livestream.net, PCWorld.com.vn, GameThu.vn, etc.); online advertising, AdNetwork, online music, e-payment, etc.
  - Global IT service: Software production, providing consultancy and deployment of S.M.A.C.I/oT, digital transformation services, IT system transformation services, quality assurance testing, embedded software design, ERP implementation and management services;
  - Software solutions, system integration and Informatics services: providing application software solutions, providing information system integration services and solutions, supplying IT equipment, data center services, networking and security system design/development; warranty and maintenance of IT products authorized by hardware vendors;

- **Investment, education and others**:
  - including the following main activities:
    - Providing training services in IT, business management majors at general education, high education, university, and post-graduate levels;
    - Managing investments in associates;
    - Managing and developing real estate projects relating to the Corporation’s infrastructure needs.

</table>

(i) Segment expenses arising from the business activities of the segment are charged directly to that segment and part of the business costs are allocated to that segment, including outbound sales costs and expenses related to transactions with other segments of the business. Accordingly, segment expenses include cost of sales, selling and administration expenses.

(ii) Segment result is segment revenue less segment expenses (excluding financial income, financial expenses, other income and other expenses). Consequently, in “Investment, education and others” segment, segment result is significantly lower than segment profit before tax, due to an amount of VND 2,406 billion which is the total of financial income and other income (most of which is dividend collected from subsidiaries of the parent).

All ordinary shares have a par value of VND 10,000. Each share is entitled to one vote at shareholders’ meetings of the Corporation. Shareholders are entitled to receive dividends as declared at each point of time. All ordinary shares are ranked equally with regard to the Corporation’s residual assets. In respect of shares bought back by the Corporation, all rights are suspended until those shares are re-issued.

Shares subject to restriction in ownership transfer have a par value of VND 10,000. These shares are subject to restrictions according to which share owners are not allowed to resell their shares within a specified term from the date of issue.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

34. CAPITAL COMMITMENTS

On 25 February 2015, the Corporation entered into a comprehensive cooperation agreement with Tien Phong Commercial Joint Stock Bank for supporting students who joined the training courses under the 10,000 Bridge Software Engineer program. This program aims to train Japanese (in 6-12 month courses) for 10,000 students in Japan in the next few years. The students who participate in this training course in Japan will be rewarded financial guarantee by the Corporation equivalent to 90% of their total credit obligations arising at the Bank, with a maximum credit limit of VND 500 million per person. As at 31 December 2019, the number of students participating in the program in Japan are 288, and the total respective estimated guarantee amount is VND 52,531,246,524.

35. SUBSEQUENT EVENTS

On 01.02.2020, the Board of Directors’ Resolution No 01.02.2020/QĐ-HQĐT/FPT dated 11 February 2020 has executed Annual General Shareholder Meeting 2017’s Resolution dated 31 March 2017 and approved the policy on share issuance for employees with notable achievements in 2019. Accordingly, the number of potential shares issued is 3,391,790 shares.

Besides, according to this Resolution, the Board of Directors has approved to increase the charter capital for FPT Software Co., Ltd and FPT Education Co., Ltd from current capital amounts to VND 2,800 billion and VND 1,000 billion respectively.
